## Highlights 2020

#### # proaktive

We have been proactive in dealing with the challenges of the COVID-19 pandemic. Organizational restructuring, radical changes to the business models of our Bublon and Binder+Co Tianjin subsidiaries and the measures taken to clear long-standing liabilities have all left a deep mark on the financial year just ended. The operating result for our group of companies in 2020 came to EUR 4.02m; however, extraordinary items totaling EUR -8.85m resulted in EBT of EUR -4.83m. Nevertheless, we now face 2021 with the certainty that we start from a healthy operating base and can move forward with significantly reduced burdens to bear.

Binder+Co Group operational EBT (prior to extraordinary items)		EUR 4.02m
Restructuring costs	EUR 1.70m	
Expenses in conjunction with the arbitration proceedings	EUR 2.85m	
Write-down of assets as a result of changes in strategy	EUR 4.30m	
Extraordinary items total		EUR –8.85m
EBT Binder+Co Group		EUR –4.83m

#### # innovative

Binder+Co has a global reputation for innovative and high-quality solutions to the tasks. We ensure this added value through the systematic design and development of our top products. We have had successful European market launches of both the BIVITEC e+, a cost-efficient and ecologically smart variant of our bestseller, and the new sensor fusion, in the CLARITY Complete Technology range. And in 2020 we extended the model range of the CIRCUPAC bagging carousel family to offer high-quality packaging of smaller product quantities.

#### # structured

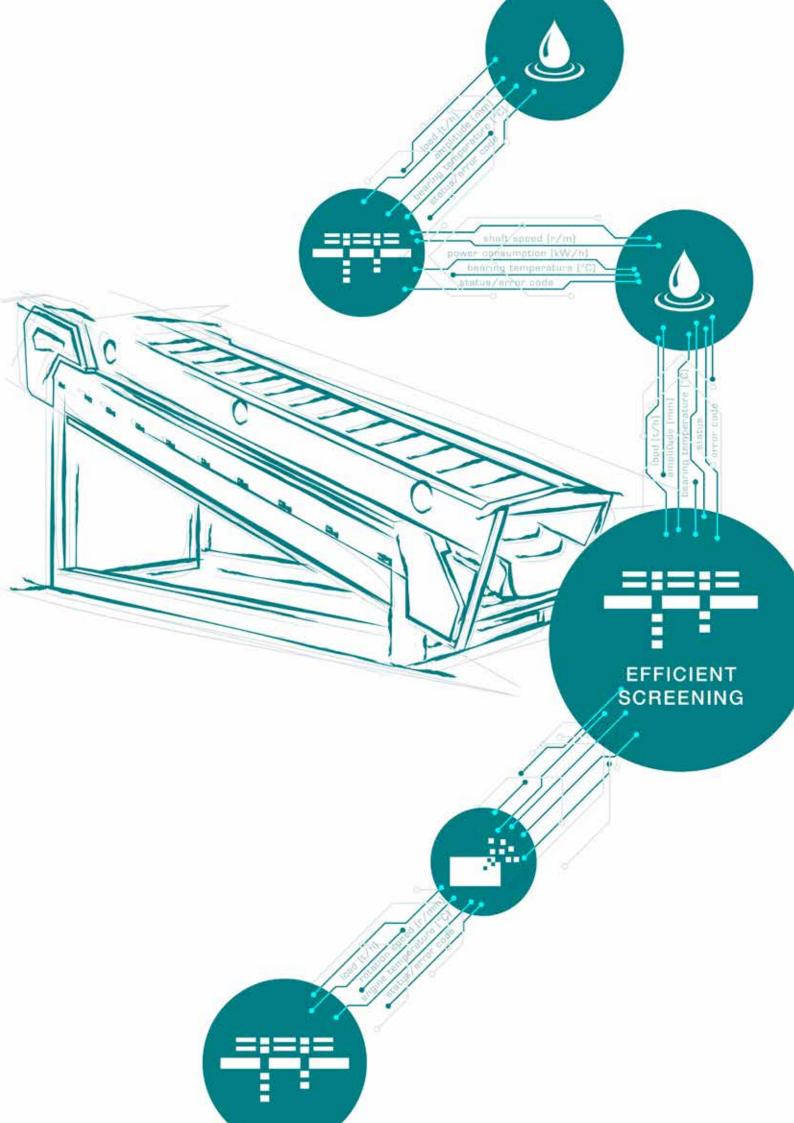

We have successfully scaled up the synergies between Binder+Co and Comec-Binder, and exploited these in practice: Binder+Co's structured project development using lean processes is combining with Comec-Binder's wet processing expertise to good effect. Against the background of these developments our Italian subsidiary recorded a strong year, both in terms of revenue and income. With its new structure, Bublon is now concentrating business activities solely on the construction of production plants for BUBLON SPHERES. And following its realignment, Binder+Co Tianjin is now focused on sales and service.

#### # digital

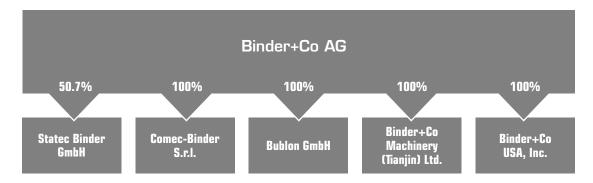

The work our customers do - preparing and packing bulk materials - will always remain a part of the physical world. All the same, with the b-connected digital strategies we are developing, communication with our customers will be easier and we will help make their production processes more effective, thereby ensuring the quality of their products and optimizing their business processes. We have already created good alternatives online, which ensure we can provide servicing around the world despite the strict travel restrictions.

#### # solid

Thanks to good order books for single machines and small systems which are being processed with care, we have a solid foundation for 2021. If some of the industry sectors we serve have proven to be stagnating or even contracting, the fact that we cover a broad mix of sectors in the recycling and raw materials industries gives us a constant supply of orders even when the economy is generally weak. In the new financial year we will be building on the sound foundations laid in 2020 and will put all our efforts into further developing and exploiting the strengths of our team.

## The Binder+Co Group

The name Binder+Co is synonymous with innovation and sustainability. With its machinery and plant, the Group is the global market leader in the screening and sorting technology fields, and one of the world's top 3 suppliers of packaging technology. As well as its headquarters and main factory in Gleisdorf, Styria, Binder+Co has locations in Italy, China and the USA. Machines and systems from the Binder Group are in use on all five continents in over 90 countries worldwide.

#### Binder+Co AG

The Group headquarters of Binder+Co AG is the heart and brain of the Group. Not only do all the core components and know-how parts used worldwide come from our original production center in Gleisdorf, Styria, but the headquarters also masterminds all the Binder+Co Group's major project developments.

#### **Statec Binder GmbH**

In 2008 we brought our packaging technology activities into a joint venture with our former competitor, Statec, and thus established an even stronger position together as an internationally sought-after specialist in the high-performance packaging and palletizing segment. Since Statec Binder GmbH was formed, the share of revenues of our packaging segment has grown significantly, recording a constant, and sizeable, EBIT margin.

#### **Comec-Binder S.r.l.**

The Italian-based Comec-Binder S.r.I., which specializes in comminution and dewatering technology, has been part of our group since 2011. Not only have we been able to expand our product range to include these two important technologies, but we have also penetrated the Mediterranean region as an important market and a springboard for further expansion in a southerly direction.

#### **Bublon GmbH**

In 2012, we founded the subsidiary Bublon GmbH for the global marketing of our BUBLON process, which was presented in the autumn of 2011. This process developed by Binder+Co enables the production of a purely natural mineral microsphere for a wide variety of industrial applications. The central business orientation of Bublon GmbH was adapted in October 2020 and now essentially consists of the construction of plants for the production of customized BUBLON SPHERES.

#### Binder+Co Machinery (Tianjin) Ltd.

We founded our Chinese subsidiary in 2013 with the aim of serving the Asian market via our own local sales, production and service location. From January 2021, an exclusive business partner handles the production on a license basis.

#### Binder+Co USA, Inc.

Our subsidiary in Denver, Colorado has been operational since August 2016. As Binder+Co has already built up good North American business relationships in the glass cullet recycling area, the initial focus of the new sales unit is on the marketing of glass, metals, plastics and minerals. As a result, the other Binder+Co products will be positioned in this important market too.

### Our Mission

#### We Create and Add Value

We provide the ideal preconditions for the sustainable conservation and efficient utilization of valuable resources. By means of our sensor-based machines, we generate value through the processing of glass cullet, metals, plastics, compost and construction waste for re-use as secondary raw materials. We also increase added value via machinery for the efficient exploitation of primary raw materials that include industrial minerals, raw materials, coal or rocks containing metals by means of comminuting, screening, wet or thermal processing, sorting and packaging.

#### **Our Innovations Set the Benchmarks**

We are the world market leader in screening and sorting technology, and we also number among the top 3 global suppliers in the packaging technology segment. In order to respond quickly to new or changed market needs, we cooperate with respected international research institutions and are constantly involved in a lively dialogue with our customers.

#### We Serve New Markets

Our innovative top products are the key to profitable growth in both established and new markets. Their modular design enables the use of locally manufactured co mponents enhanced by advanced technology delivered directly from Gleisdorf. This enables us to su pply customized solutions with an optimized price-performance ratio in overseas markets.

#### **Our Strong Team Is the Basis for Our Success**

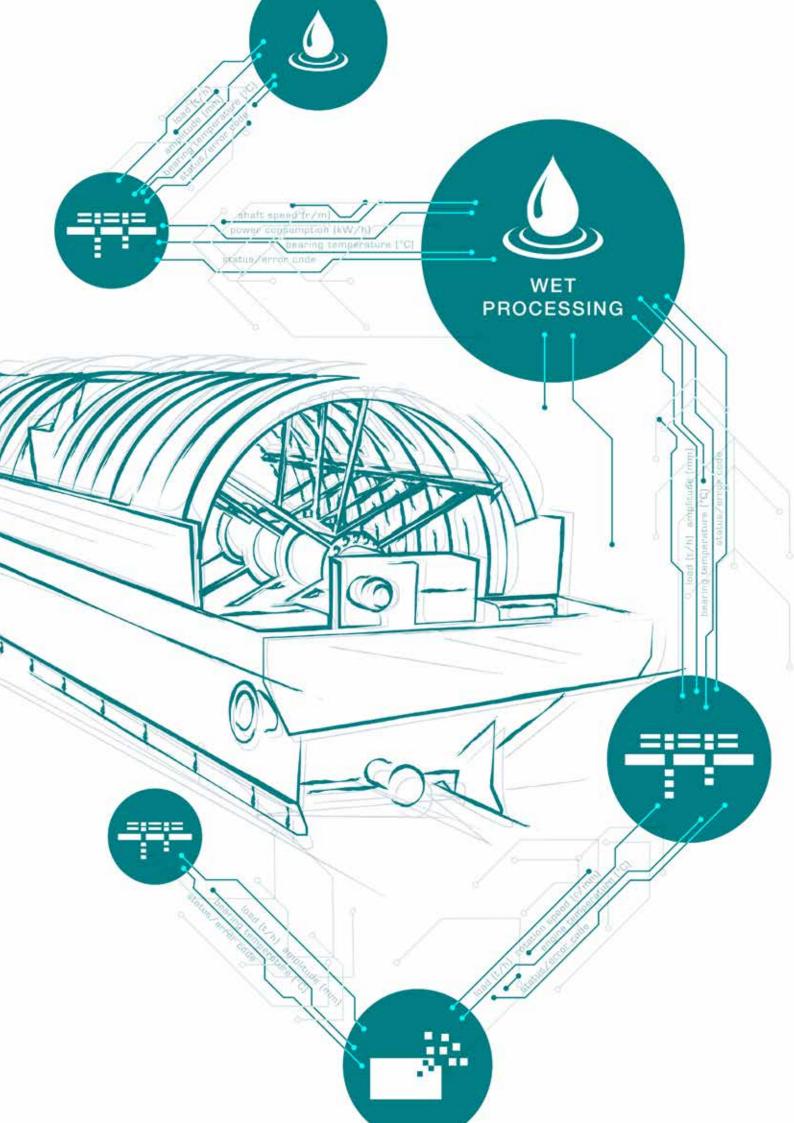

The basis for our success is our team of high-performing and highly motivated employees. Every single one of our employees is familiar with our company's long tradition and history. The way in which we develop every day is an expression of our constancy. Our low employee turnover rate forms a crucial basis for our continuous development as a company.

## A Global Presence

In these countries, Binder+Co has completed projects directly from its headquarters in Gleisdorf.

In these countries, Binder+Co is represented by a sales partner.

## Strong Products

Comec-Binder S.r.I. is the specialist in the Binder+Co Group for crushing technology. **COMEC** products consist of various machine series for the primary, secondary and tertiary comminution areas, which cover an extensive range of applications in the mining, industrial minerals, construction materials and recycling industries.

efficient screening

Binder+Co is the world's leading supplier of screening machines for the separation of primary and secondary raw materials according to grain size. Our top product **BIVITEC** offers a simple and effective solution for the especially demanding classification of wet, fine and sticky materials.

#### wet processing

The focus of wet processing is on cleaning, washing and dewatering of building materials and industrial minerals. Binder+Co and COMEC offer solutions with filter and belt presses, sand traps, bucket wheels, washing drums, attrition machines and hydrocyclones. With strong systems for process water treatment, additional care is taken to ensure that the precious raw material water is returned to the natural cycle.

The thermal processing area comprises machines for the drying, cooling and thermal treatment of bulk goods. The DRYON fluidized bed dryer provides efficient and protective drying and cooling for example of coal, potash, recycling materials, foods and feedstuffs, and chemicals. With BUBLON, the Bublon GmbH subsidiary offers a process for producing purely natural mineral microspheres for a diversity of applications

#### precise sortina

thermal processing

in a range of industrial branches.

With **CLARITY** and **MINEXX**, Binder+Co has developed sensor-based sorting systems that cover a wide range of tasks in the raw materials and recycling industries. Equipped with a variety of sensors, the machines detect and sort bulk materials based on their color, shape, chemical composition and atomic density as well as their fluorescence behavior. For decades, Binder+Co has been the leading specialist in sensor-based sorting of waste glass.

#### bagging palletizing

Under the Statec Binder brand, Binder+Co is a top international player in the packaging technology field. In addition to high-performance, open mouth bagging, this segment also incorporates palletizing technology. The **PRINCIPAC** system furnishes the highspeed, open mouth bagging of free-flowing bulks such as fertilizers, plastic granulate, seeds, foods and feedstuffs or salts. Our product range is rounded off by the robust and reliable **PRINCIPAL** series of high-level and robot palletizing systems, which are at the cutting edge of technology.

#### **Processes and Segments** RELIABLE Comec-Binder S.r.l. CRUSHING Processing Technology Industrial minerals, iron and steel industry, construction materials, EFFICIENT mining Binder+Co AG SCREENING WET Comec-Binder S.r.l. PROCESSING **Environmental** Technology Recycling industry, glass, metal, plastic, compost, Binder+Co AG THERMAL construction waste **Bublon GmbH** PROCESSING SENSOR-BASED Binder+Co AG SORTING Packaging Technology Petrochemicals, foods and feedstuffs, chemistry, BAGGING fertilizers, agricultural Statec Binder GmbH PALLETIZING products and minerals

We offer six processing steps in three market-oriented and differentiated segments, all of which are tailormade to meet the respective needs of our various customer groups. We attribute sales revenues and results to the individual segments on the basis of primary customer access.

## Strategy

#### **Our Three Strategic Cornerstones**

#### **Product Leadership**

We develop and manufacture first class products. The basis for this is provided by ongoing analysis of the various processing sequences used by our customers and early recognition of, for example, shifts in environmental policy, so that we can meet new customer demands rapidly and as well as possible. In particular, we focus on developing new products and machine concepts which can be utilized in different configurations thanks to their modular design. An optimized product portfolio that offers customized solutions on the basis of a wide variety of individual modules secures our strong market position as a technology leader.

At Binder+Co innovation is more than just a buzzword, because with our innovative and modern solutions we are shaping the future. In so doing we count on collaborating closely with international research and development specialists, and on integrating our suppliers and above all our customers. We are constantly striving to anticipate future requirements of our customers and to meet them in developments. In 2019, the focus of the research and development activities was on expanding the multifunctionality of the existing top products and on developing new products as well as processes.

The BIVITEC e+ screening machine was developed in 2019, which, thanks to its minimal dynamic loads, reduced weight and significantly lower energy consumption, offers new solutions for a huge range of different screening applications. Due to the COVID-19 pandemic, its global launch took the form of an online live stream in June 2020. A group of experts presented the new screening machine and answered questions from the industry sector viewers from around the world.

Great progress has been made in the area of LIBS (Laser Induced Breakdown Spectroscopy) technology. This can be deployed in both the sorting of secondary raw materials (waste electrical equipment shredder fractions, scrap metal) as well as of primary raw materials (minerals, ores). Together with the existing XRT technology, this further expands our expertise in the area of metals recycling.

With b-connected, further steps were taken in the digital control and networking of machines and plant in 2020.

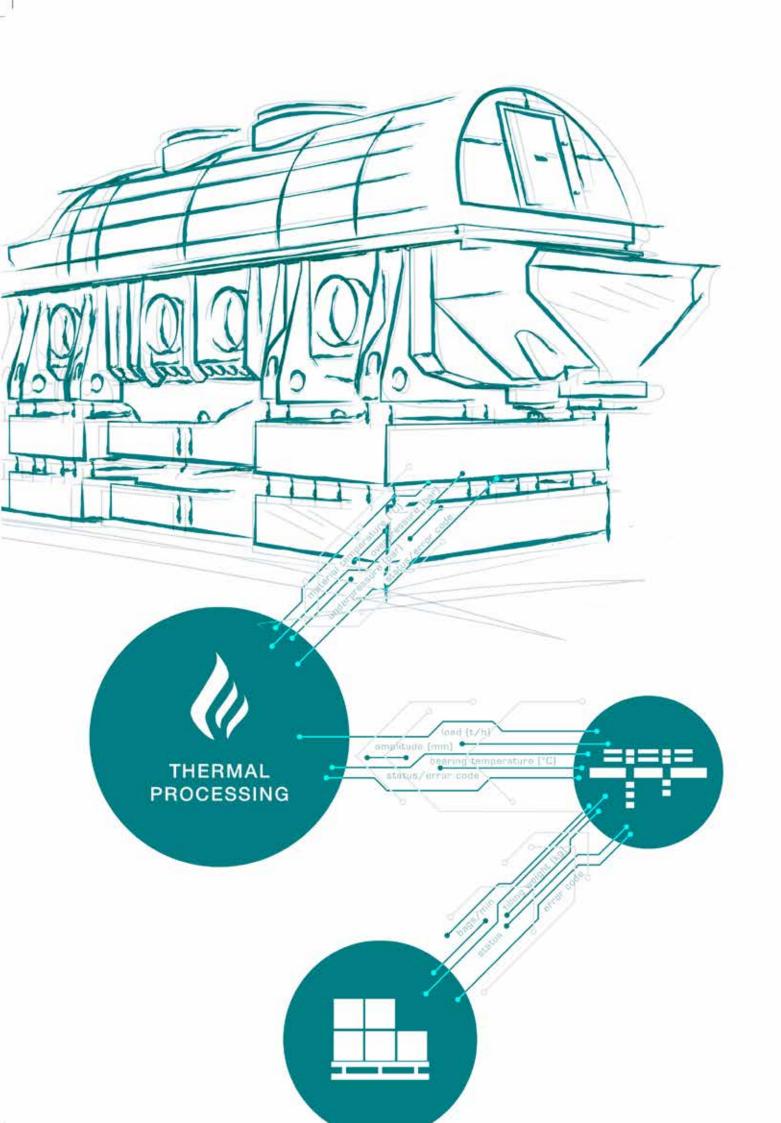

R&D expenditures in the reporting year fell slightly from the previous year's level. Actual expenditures in 2020 amounted to EUR 1.77m (2019: EUR 2.04m).

#### **Market Reach**

Binder+Co is focusing on its strategic objective of selling directly to the markets through our sales team and partner network which together give us a global reach. In 2020 we continued to pursue a clear regional strategy, facilitating the selective development of new markets. Targeting of key customers, who can then serve as reference customers in new markets, was central to the strategy. Customers benefit from a wide range of solutions specific to their activities and based on modular products. Our highly professional key account management activities are also instrumental in making us a much-appreciated partner and process advisor to our customers. In addition to our core markets in Europe, we are focusing on the regions of North and South America together with Asia, where we concentrate especially on India, South Korea, Japan and China.

#### **Operational Excellence**

As a systems supplier and process consultant, we attach great significance to the securing and transfer of specialist expertise. In addition to the ongoing optimization of the internal process sequences, knowledge management and sound personnel development form the most important bases for sustained growth. In combination with optimum order handling, improved internal procedures ensure the shortest possible machine delivery times and thus create a significant competitive advantage.

## Sustainability

As a technology company, our first priority is to combine our fundamental strategic values with treating our environment in a responsible way. It is only in this way that we can build a reliable foundation for the future, and thus also safeguard our long-term success. Binder+Co stands in the interplay between the stakeholders' expectations and a dynamic market environment which is characterized above all by increasing competition and by framework conditions that are becoming more complex legally.

#### **Economic Sustainability**

With our machines and equipment for the ultra-efficient processing of primary and secondary raw materials, we ensure that fewer raw materials are extracted worldwide – and thus with our innate company activity itself we contribute to the protection of valuable habitats and resources.

It is only by means of the continuous further development in our three key areas of processing, environmental and packaging technology that we are able to maintain and extend our unique market position as a leading supplier and partner.

We measure our own corporate success by the success of our customers, and for this reason, we are always in an open dialogue with them. In their lively exchanges with our sales team, our customers frequently provide the impetus for us to develop new products. With our open innovation approach, we succeed in promptly recognizing emerging needs and developing new, improved technologies for processing primary and secondary raw materials. Our customers in turn benefit from our being able to offer them a rapid and comprehensive solution for their current needs. The basis for this relationship as partners is the customers' trust in our sustainable development and our broad product range.

#### **Respect for the Environment**

#### **In-Group Resource and Energy Efficiency**

Internally too we are motivated both economically and ecologically, and attach the greatest value in all areas of the company to using resources sparingly. This is why on average we invest EUR 0.5 million a year in the latest production technologies, and thus maximize the energy and resource efficiency of our production processes.

#### **Reduced Waste, Noise and Emissions**

We employ an officially approved, comprehensive waste management concept, and our endeavours to reduce operating emissions are aligned with the European Union Directives in force.

#### Appreciation of our Employees

We are perceived as an attractive and responsible employer: we work continuously to offer our employees a motivating working environment and enable them to develop their potential in the long term.

The way we work with our employees is highly partnership-based, because we are aware that this is the basis for our economic success.

This high appreciation of our employees results in their team spirit and their high job satisfaction, which is expressed amongst other things in the low turnover rate of 2–3% a year. At the same time, this has given us the reputation of being an attractive employer. This positive corporate image is also perceived by our customers; it increases their trust in our group and thus also serves to secure our economic success.

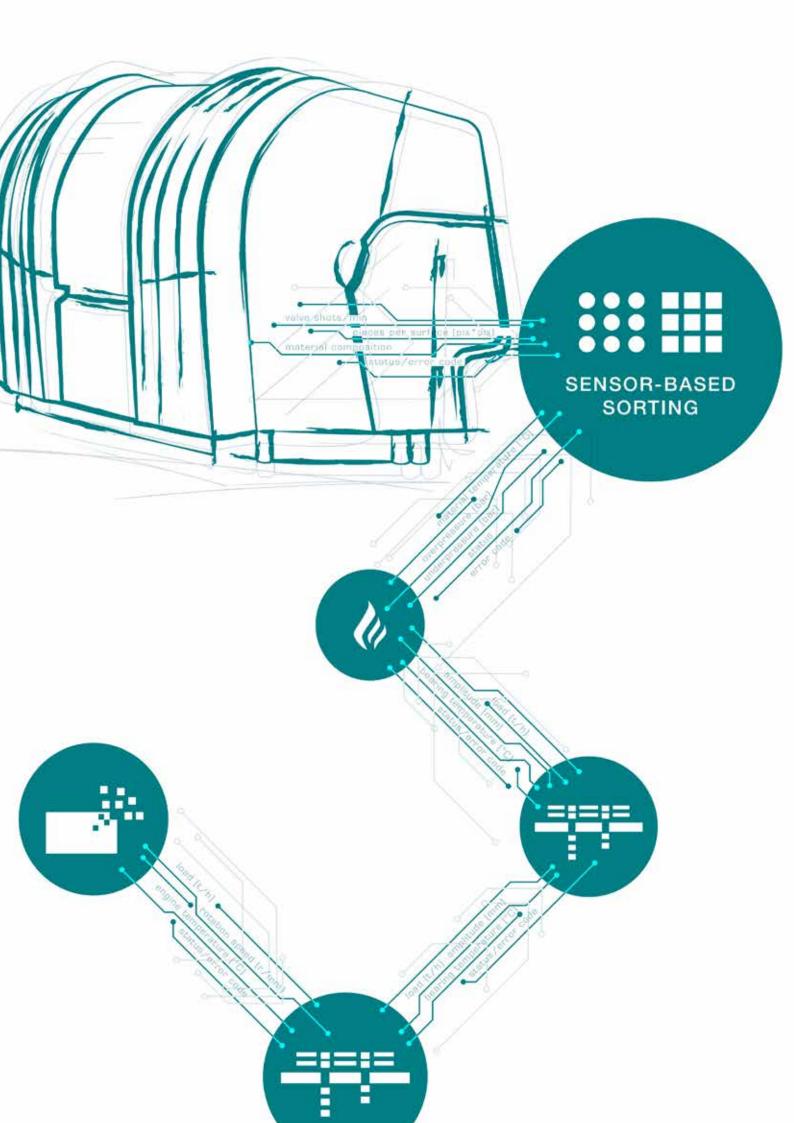

#### **High Safety Standards**

We are committed to ensuring comprehensive protection for our employees and therefore work continuously to improve health and safety standards throughout the Group. A key statistic in this area is the number of accidents at work per million hours worked. Having started with a figure of 29.16 in 2007, the average figure for Binder+Co AG over the last three years of 12.52 is already at a low level for the sector, albeit slightly higher than in the previous year (2019: 11.15). It is, however, our declared objective to achieve industry-best figures of under 10 and to guide our subsidiaries towards this level as well.

#### **Comprehensive Apprentice Training**

Apprentice training has always occupied an important position for Binder+Co. The fact that our apprentices regularly qualify for national, European and worldwide apprentice championships proves the high level of our internal training.

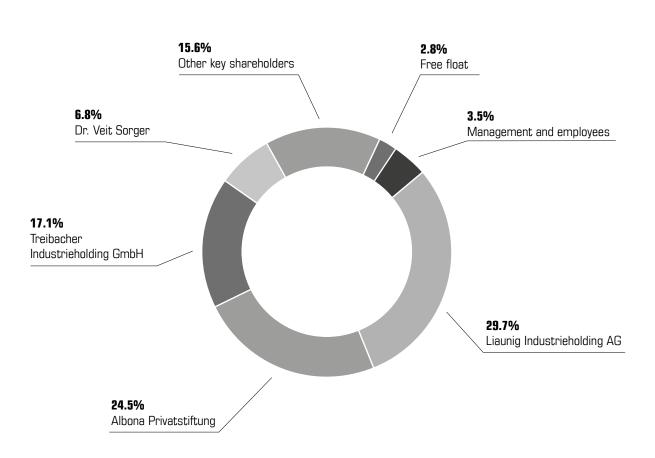

As well as conveying technical skills, our apprentice training also actively encourages the young people's communication and social skills. Our current internationalization efforts lend this form of training by our own skilled workers even more weight, as excellently trained workers make a substantial contribution to successfully setting up assembly support points abroad.

## The Binder+Co Share

#### A Solid Ownership Structure

The number of shares issued now corresponds entirely to the nominal capital, which is divided into 3.750.000 registered shares with a nominal value of EUR 1.00 per share. Liaunig Industrieholding AG holds 29.7% of the shares, the Albona Privatstiftung holds 24.5%, Treibacher Industrieholding GmbH 17.1%, and Veit Sorger 6.8%, with 15.6% held by other key shareholders and 3.5% by the management and employees. The remaining 2.8% of the shares are in free float.

#### **Investor Relations**

Even after its delisting, Binder+Co AG still fulfils its claim to transparent communication with its shareholders. Thus, press releases and information about major events and developments in the current financial year are available for downloading in the Investor Relations section of the company's website www.binder-co.com at any time.

## **Board Members**

#### **Supervisory Board**

Kerstin Gelbmann, born 1974 Chairwoman

Alexander Liaunig, born 1970 Vice-Chairman

Kurt Berger, born 1966

Hubertus Nikolaus Schaschl, MSc, born 1976

Veit Sorger, born 1942

Harald Simon, born 1964

Staff Council Delegates:

Doris Leiner, born 1981

#### **Management Board**

#### **Martin Pfeffer**

Born 1970 in Oberstdorf, Germany, married Member of the Management Board since 1 January 2018 Current term runs until 31 December 2020

Studied business administration at the University of Graz (specializing in trusteeship and organization) with a period studying at Liverpool John Moores University. From 1997 to 1999 he worked as a Board assistant at Alfred Wall AG, Graz; from 1999 to 2000 at Cap Gemini Ernst & Young AG as Manager for Performance Measurement/Controlling and Middle-Market Consulting; and since 2001 at Management Factory Corporate Advisory GmbH as an interim manager in various Austrian companies.

As Management Board member responsible for finance and controlling, production, engineering, research and development, procurement, human resources and information technology, as well as for the subsidiary Bublon.

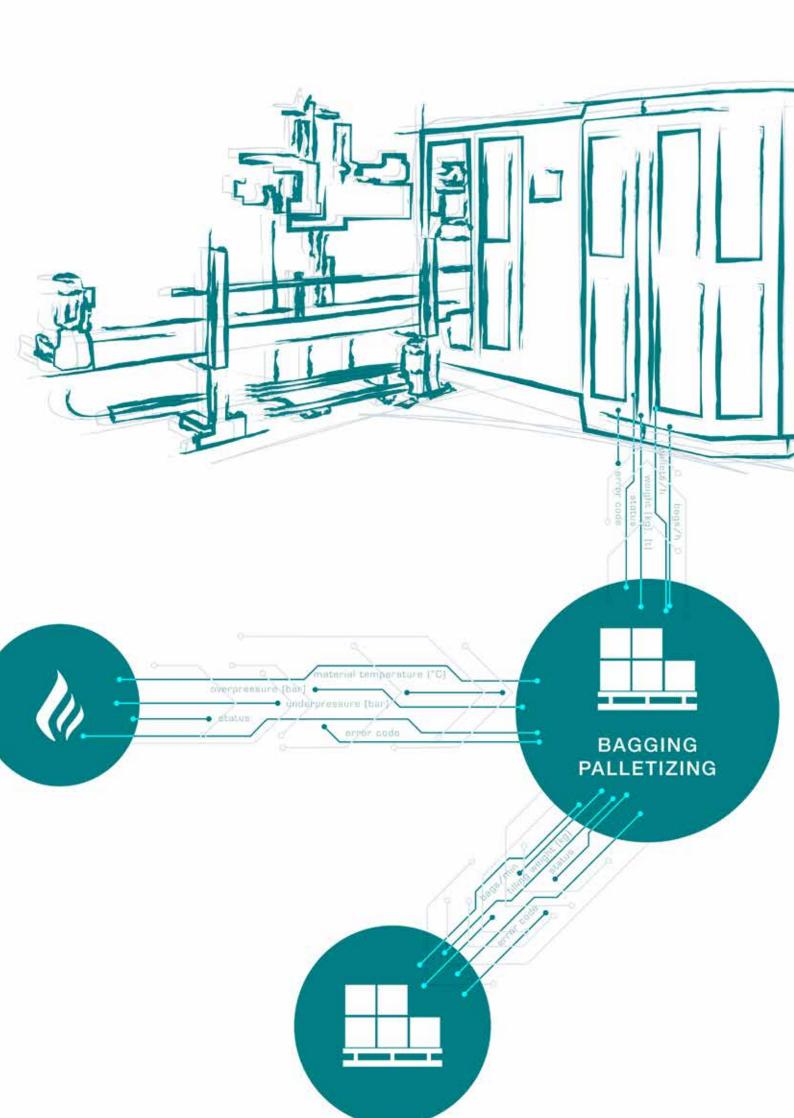

#### Jörg Rosegger

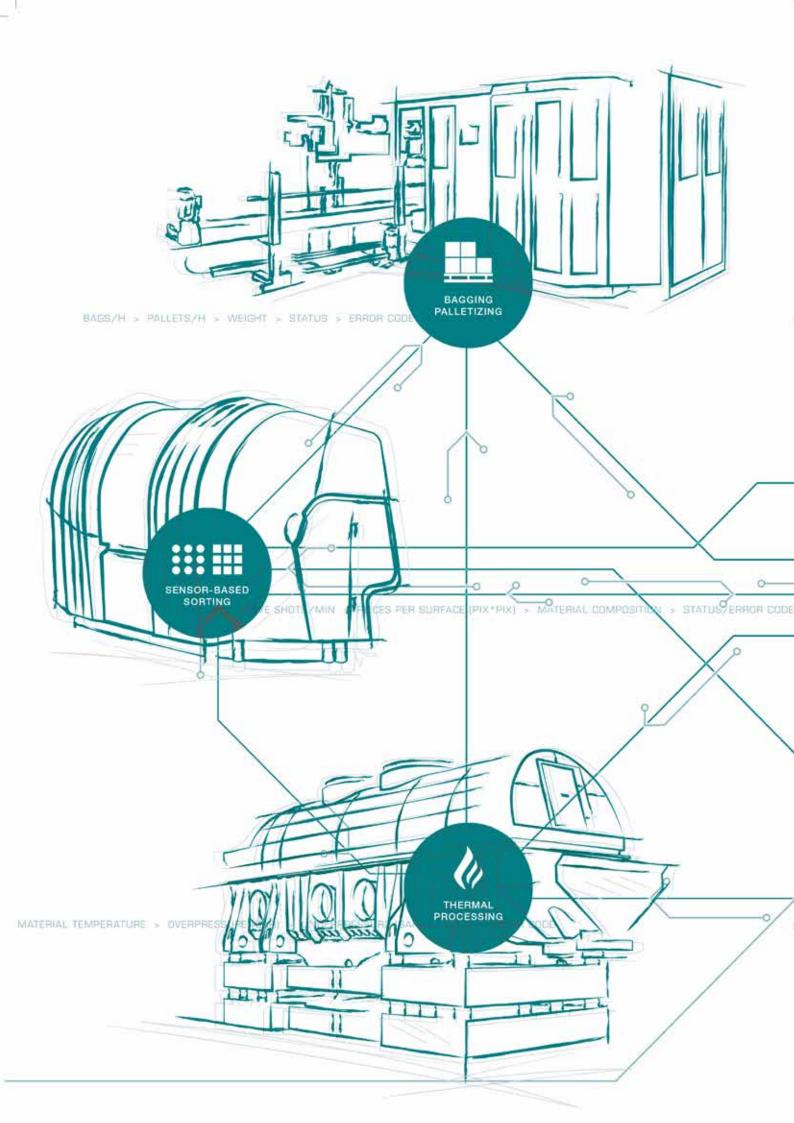

Born 1966 in Bruck an der Mur, married, 2 children Member of the Management Board since 1 January 2007 Current term runs until 31 December 2021

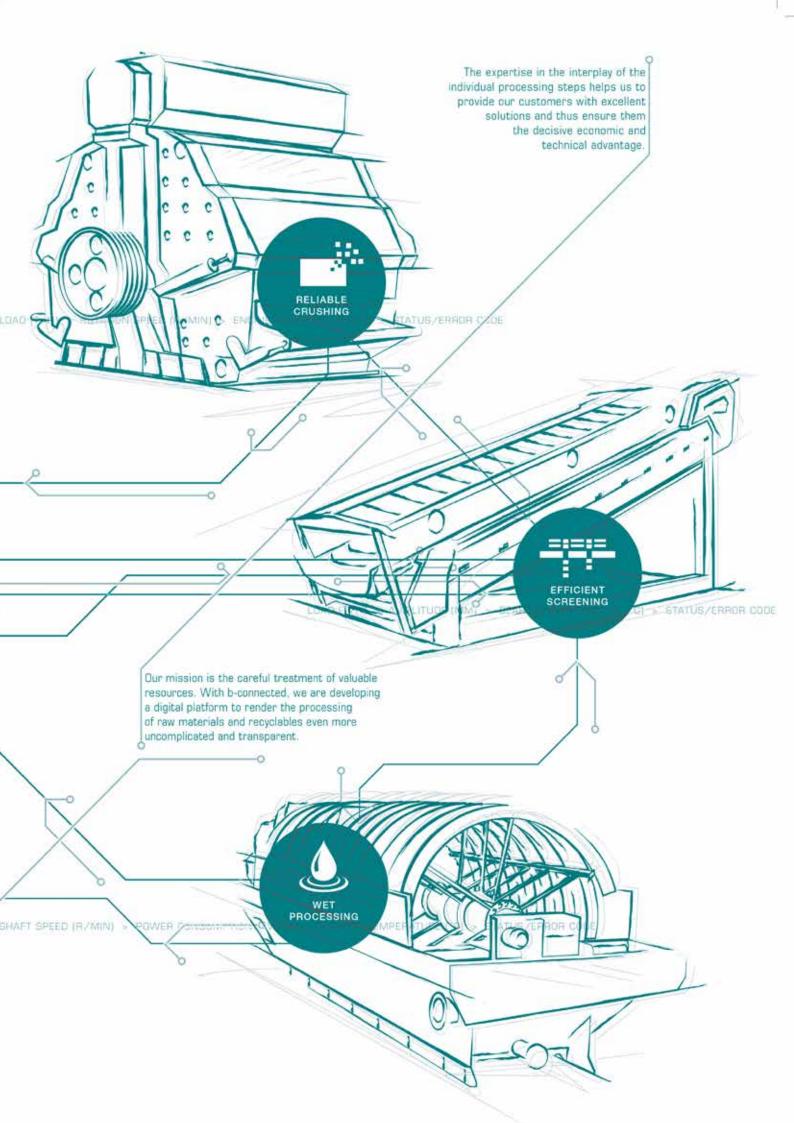

As part of his business administration studies at the University of Graz (specialising in marketing and industrial management) he spent one year at Butler University in Indianapolis, IN, USA on the International Student Exchange Program. After completing his studies in 1993, he joined Binder+Co AG as assistant to the Management Board and marketing manager. He was appointed product manager for the Packaging Technology division in 1995, becoming the divisional manager in 1997.

In 2000 he assumed overall responsibility for sales and marketing in the Group, with full power of attorney.

As Management Board member responsible for sales and marketing, project management, after-sales and quality assurance, as well as for the subsidiaries Statec Binder, Comec-Binder, Binder+Co Tianjin and Binder+Co USA.

# Group Manage

## ment Report

## **General Conditions**

The outbreak of the COVID-19 pandemic and the measures introduced by governments around the world also had far-reaching consequences for Binder+Co. The OECD assumes, for 2020, a global decrease in GDP of -4.2%; and for the eurozone, which is so critical for Binder+Co, a decrease of -7.4%.

The fight against the COVID-19 pandemic poses a huge challenge to the world; and the state of emergency which has gone on for months now has led to planning uncertainty such as has not been seen for decades. A resulting sense of caution where investment is concerned is apparent in single machine purchases just as much as in the ever more complex systems business. One result is that larger investment decisions are being put back; another is that customers are tending even more to make much more complex technical, commercial and legal demands of their suppliers. At the same time, the limited-period investment incentive programs that some European governments have introduced (e.g. the Investment Premium in Austria) are leading in the short term to a marked increase in demand for capital goods.

In addition to the general negative impacts of the COVID-19 pandemic on business, the restrictions on international travel are making it more difficult to stay in touch with customers and maintain global servicing quality.

Even though it becomes more difficult to acquire new projects against this background, it does also open up opportunities. Values such as reliability and consistency, and the appreciation of how high-quality machines and plant give greater security to capital expenditure projects, are playing a bigger role. For Binder+Co this means, on the one hand, being more selective about the projects undertaken, but on the other hand, having the opportunity to acquire systems and project work at acceptable terms and conditions.

Investment decisions continue to be characterized by technical and commercial criteria such as efficiency, economic viability and payback calculations. Binder+Co is also benefiting from the trend towards ever more recycling and associated sustainability issues. The machines designed and built by Binder+Co not only ensure a greater and more efficient yield of valuable raw materials, but can also be deployed in the recovery of recyclable materials in the recycling process.

## Reporting/Scope of Consolidation

Binder+Co AG holds 50.7% of the shares in Statec Binder GmbH, into which the Packaging Technology segment of Binder+Co AG was incorporated in 2008. The company is thus fully consolidated in the consolidated financial statements of Binder+Co. The revenues and results of Statec Binder GmbH are allocated to the Packaging Technology/Other segment.

In 2011, following the acquisition of Comec S.p.A., Binder+Co A G set up a new subsidiary - Comec-Binder S.r.I - in Italy, which is 100% incorporated into the Binder+Co Group. Bublon G mbH, which was founded in 2012, is also 100% owned by Binder+Co AG. The revenues and results of both of these fully-consolidated subsidiaries are allocated to the Processing Technology segment.

Binder+Co AG also owns 100% of Binder+Co Machinery (Tianjin) Ltd., which was set up in 2013, as well as Binder+Co USA, Inc., which has been operating since August 2016. The revenues of both subsidiaries are allocated, depending on which sector is being serviced, either to the Processing Technology or to the Environmental Technology segment.

## Market Environment

From Binder+Co's standpoint, the first big international wave of the COVID-19 pandemic led to a sharp decline in willingness to invest in its main sectors in the first half of 2020. The orders booked reduced by more than 18% over the previous year. This trend was reversed in the second half of the year, with the result that the whole-year downturn as compared to the previous year came to just under 12%. The main reason for the turnaround in the second half of the year was because of developments in the European markets. Not only did Binder+Co AG benefit from this, but the Italian subsidiary Comec-Binder S.r.I. did so too: indeed it was the only Group company that was able to increase order income over the previous year's level.

The situation in North and South America, as well as in Asia, was much more difficult. While demand in the US remained significantly below previous-year levels throughout the year, the core markets in Asia did at least pick up towards the end of the year. The petrochemical and coal sectors were particularly badly hit, reacting to the international collapse in prices with more or less a complete halt to investments. Both Statec Binder GmbH and our Chinese subsidiary Binder+Co Machinery (Tianjin) Ltd. were particularly affected by this. Furthermore, there were no signs of an improvement to the situation in their sectors as the year drew to a close.

In Europe, by contrast, state-controlled investment incentives in infrastructure measures as well as in sustainable environmental technologies led to an increase in demand. This was experienced not just in the recycling industry, but also in the sectors supplying raw materials for construction. There was increased interest shown in the technologies for the sensor-based sorting of materials as well for more efficient production of raw materials for construction such as gravel and sand.

Despite the difficult political situation in the CIS markets of Russia and Belarus, Binder+Co AG is still successful with its potash drying technology, although volumes have declined somewhat. Investments in sensor-based technologies for recycling and higher-value extraction of gems in some South American markets (Peru, Columbia and Chile) are hopeful signs that the rest of the region will soon follow on.

### **Business Development**

The Binder+Co Group started the 2020 financial year with a good level of orders booked, with a value of EUR 42.99m and characterized by a healthy mix of several smaller systems projects and single machines. At year-end, the value of orders booked stood at EUR 38.85m, and thus –9.6% lower. The downturn is due in particular to the Packaging Technology/Other segment, whereas in comparison to the previous year the Processing Technology segment booked a higher volume of orders and the Environmental Technology segment's order backlog was at a comparable level, standing both in good stead for 2021.

A significant decrease over the previous year was recorded both for revenues, at EUR 99.02m (2019: EUR 113.41m) and for EBT, at EUR -4.83m (2019: EUR 3.38m).

Restructuring costs	EUR 1.70m
Expenses in conjunction with the arbitration proceedings	EUR 2.85m
Write-down of assets as a result of changes in strategy	EUR 4.30m
Extraordinary items total	EUR 8.85m

Due to the impact of the COVID-19 pandemic and the resulting downturn in order intake and revenues, a restructuring process was initiated in the fourth quarter of 2020 to reduce both personnel and purchased goods/services. A provision of EUR 1.70m was created for the costs associated with headcount reduction (a social plan, compulsory retention costs linked to individual notice terms).

Arbitration proceedings took place in December 2020 in conjunction with a systems project in England; adjudication is expected in April 2021. Some EUR 2.32m in consultation costs were incurred for these proceedings in the reporting year. Due to the unanticipated magnitude of the costs of the proceedings, higher cost absorption of the legal defense costs was agreed with our insurers, with the result that an additional EUR 1.69m of insurance indemnification was paid out in 2020. Conversely, deferred costs of EUR 1.88m had to be released from a different insurance component. Furthermore, a value adjustment had to be made for receivables totaling EUR 0.34m because of the litigation risk.

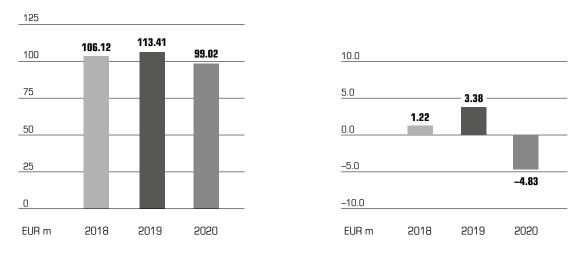

The changes in strategy implemented at Bublon GmbH (discontinuation of Spheres production and concentration henceforth on the systems business) led to a write-down of EUR 4.28m worth of assets connected to Spheres production at Binder+Co AG and Bublon GmbH.

The abovementioned factors resulted in EBT for the Binder+Co Group amounting to EUR 4.0m in the 2020 financial year.

Highlights 2020 Profile Visions Values The Binder Year 2020 Service

#### **Sales Revenues**

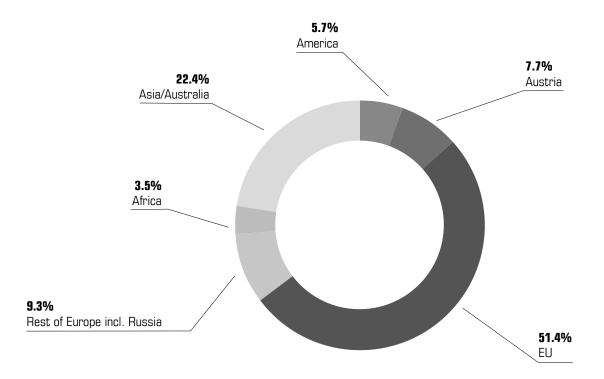

#### **Export Business**

In the period under review the Group's export sales accounted for 92.3% of total sales (2019: 92.3%), proving again how important the export business is. EU Europe (not including Austria) was the largest sales market, accounting for 51.4% of sales (2019: 32.0%), followed by Asia/Australia with 22.4% (2019: 22.1%). The rest of Europe including Russia accounted for 9.3% (2019: 19.9%); the Americas contributed 5.7% (2019: 6.2%) and Africa 3.5% (2019: 12.1%).

Sales Revenues 2020 by Regions

#### **Product Segments**

#### **Processing Technology**

In the Processing Technology segment, sales of single machines remained at a consistently high level in 2020. The main successes with systems sales were recorded with key accounts in the German-speaking countries and in the potash industry. There was also increased demand for sensor-based sorting of minerals and gems. The Processing Technology segment recorded sales revenues of EUR 38.09m (2019: EUR 35.19m), which represented a 38.5% share (2019: 31.0%) of total sales revenues. Binder+Co AG's share of sales revenues remained almost unchanged compared to the previous year, whereas Comec-Binder S.r.I. and die Bublon GmbH recorded strong increases in their shares. Strong demand for processing technology in particular in the second half of 2020 led to a significantly higher order intake of EUR 44.68m compared to the previous year (2019: EUR 41.66m).

#### **Environmental Technology**

With sales revenues of EUR 25.10m (2019: 34.07m) the Environmental Technology division recorded a 25.3% share of total sales revenues (2019: 30.0%). While there was a significant increase in the order intake for single machines and small systems, larger investment projects were not entered into in 2020, either in the US or in Europe. This was only offset to a limited extent by growth in new recycling markets (metals recycling, construction waste, MSW). Overall this led to a reduction in order intake over the previous year, to EUR 24.45m (2019: EUR 28.84m).

#### Packaging Technology/Other

With sales of EUR 35.83m in the 2020 financial year, the Packaging Technology segment could not match the record levels of the previous year (2019: EUR 44.15m). The South American and Asian markets, which are so important for the segment, continue to be greatly affected by the economic impact of the COVID-19 pandemic. This was compounded by the plunging prices in the petrochemicals industry, which brought investment in the sector to a standstill. All these factors led to a marked downturn in order intake of EUR 27.89m (2019: EUR 40.16m).

#### **After Sales Service**

After Sales Service's share of sales revenues in 2020, at 28.1% (2019: 25.4%) underlines the efforts being made throughout the Binder+Co group of companies to bring about long-term success in their important sectors and markets with a responsive, customer-friendly service organization. Even though the travel restrictions imposed as a result of COVID-19 meant on-site servicing at customer premises was severely limited, it was possible to counteract this through the targeted development of digitalized support measures. This strategy will be developed to strengthen the replacement parts business in the next few years.

#### Demand Trends in the Reporting Period

Binder+Co started the financial year 2020 with a very healthy order book worth EUR 42.99m (2019: EUR 47.70m); but this was affected by a downturn in demand at the beginning of the year. A distinct upturn was recorded from the start of the second half, as numerous single machines and small systems were sold in Europe in particular; but additionally orders for some mid-size systems projects in the areas of potash drying and sand treatment were won.

Comec-Binder S.r.I. started the new financial year with a good order book compared to prior years; and, thanks to a positive investment climate in Italy and despite the COVID-19 pandemic, was able to increase order intake by more than 30% over the previous year.

The Packaging Technology segment experienced almost the reverse trends, in a year in which Statec Binder GmbH started 2020 with a record order book. However, a collapse in demand in Asia and South America due to COVID-19 led in the second half of the year to demand falling well short of expectations in comparison to previous years; and to a significantly lower order backlog going into the start of 2021.

Environmental Technology sales in the US were restricted primarily to replacement investments in single machines; no new orders were placed for glass recycling systems.

As a result of the essentially very cautious investment climate in our focus markets, with the exception of Comec-Binder S.r.I. and Bublon GmbH, none of the other companies were able to record an increase in orders booked. As of year-end 2020, the Binder+Co Group had orders to the value of EUR 38.85m booked, which provides a sound basis going into the next financial year.

#### Production

Binder+Co has production facilities at its locations in Gleisdorf and Badoere di Morgano, in Italy; these are set up to manufacture the Group's core products and components.

By contrast, Binder+Co USA, Inc., which is located in Denver (Colorado, USA) is purely a sales and service subsidiary that occupies rented office premises and has a well-equipped spare parts store.

The Wuqing location in the Chinese region of Tianjin has up until now worked on the basis of buying in steel components and, with the core components supplied from Gleisdorf, then assembling machines and plant there. Complexity and fixed costs were reduced in this area in 2020 as a result of the change in business model that had previously been implemented. Starting in 2021, machine assembly will be undertaken wholly with local partners operating on a license basis. Binder+Co Machinery (Tianjin) Ltd. operates solely as a sales and service subsidiary that occupies rented office premises.

#### Procurement

Most Group companies have their own purchasing departments, which, in addition to the primary materials for the manufacture of machine parts, also source steel components and mechanical engineering parts of secondary importance worldwide. Most procurement takes place in Europe, but procurement also takes place in the relevant Asian, African and North American target markets.

#### Investments

The largest investments in 2020 were again centered on the Gleisdorf location. At Binder+Co AG, a processing center was refurbished, with crane installations and the logistics area being modernized. At the Statec Binder GmbH site, the construction of the production hall was completed, which has led to a significant expansion of the production space available. Investment activity overall was reduced as a result of the COVID-19 pandemic; at the other locations it was restricted to office fittings and fixtures, as well as minor modifications to production areas.

#### Financing

As at 31 December 2020 Binder+Co Group's equity amounted to EUR 23.86m (2019: EUR 27.14m). Despite a lower total assets sum of EUR 85.40m (2019: EUR 87.23m) and no dividend distribution to shareholders, a lower equity ratio of 27.9% (2019: 31.1%) was recorded, as a result of the consolidated loss of EUR -3.94m.

Financing of the expansion drive that commenced in 2011 - and in particular the associated capitalization of newly founded companies, as well as investments in offices and production buildings - has been largely facilitated through bank loans. Liabilities to banks were reduced by EUR 1.41m in the financial year and totaled EUR 17.82m as at 31 December 2020 (2019: EUR 19.23m), of which EUR 11.70m can be classified as non-current and EUR 6.12m as current.

A new financing and debt rescheduling agreement was reached with the lending banks in 2019, in which current liabilities to banks reach their term by 31 December 2021 and must be rolled over in the course of the 2021 financial year. In order to secure liquidity, the Group availed itself of an additional refinancing facility worth EUR 6.00m with the Kontrollbank, as part of the COVID-19 help measures offered by the Federal Ministry of Finance and the Österreichische Kontrollbank. The term agreed is "until further notice", but runs until 31 March 2022 at the latest. If there continues to be sufficient liquidity, the intention is to pay back the new loan ahead of term.

When concluding the credit agreements, care was taken to match maturities. Short-term financing requirements are also covered by overdraft facilities and fixed-rate advances.

#### **Branch Offices**

The Group has no branch offices.

## Financial and Non-Financial Performance Indicators

#### **Report on Selected Financial Performance Indicators**

#### **Sales Revenues and EBT**

Binder+Co Group recorded consolidated sales revenues of EUR 99.02m (2019: EUR 113.41m) in the 2020 financial year.

At EUR –4.83m (2019: EUR 3.38m) the EBT result was significantly below expectations, and can be ascribed to the following extraordinary factors in particular:

Restructuring costs	EUR 1.70m
Expenses in conjunction with the arbitration proceedings	EUR 2.85m
Write-down of assets as a result of changes in strategy	EUR 4.30m
Extraordinary items total	EUR 8.85m

Binder+Co Machinery (Tianjin) Ltd.	0.43	0.49
Binder+Co USA, Inc.	0.33	0.38
Internal business	-0.52	-0.45

1) The basis for the calculation of the ROE values is the amount of equity at the beginning of the respective year.

### **Order Backlog**

As at 31 December 2020, Binder+Co's order backlog for 2021 and subsequent years totaled EUR 38.85m. This is 9.6% lower than the value for the previous year (2019: EUR 42.99m). As at 31 December 2019, the order backlog had included multiple smaller systems projects, which were successfully processed and completed in the course of 2020. Although order intake for the Processing and Environmental Technology segments remained stable in comparison to the previous year, in the Packaging Technology/Other segment there was a downturn in the orders placed in the - for the Statec Binder GmbH - core Asia market, which must be seen as a consequence of the COVID-19 pandemic.

#### **Equity Ratio / ROE**

As at 31 December 2020 Binder+Co's equity amounted to EUR 23.86m (2019: EUR 27.14m). Based on the lower total assets sum of EUR 84.40m (2019: EUR 87.23m) together with the fact no dividend has been paid to shareholders (2019: EUR 0.00m), the resulting equity ratio is calculated as 27.9% (2019: 31.1%).

 $ROE_{EBT}$  sank from 13.5% in 2019 to -17.8% in 2020. The basis for the calculation of the ROE values is the amount of equity at the beginning of the year in question.

### Working Capital

Working capital (current assets minus current liabilities) for Binder+Co decreased from EUR 6.29m in 2019 to EUR 3.07m in 2020.

### **Cash Flow**

EUR m	2020	2019
Cash flow from earnings	3.17	7.96
Cash flow from operations	9.78	
Cash flow from investment activities	-5.02	-4.58
Cash flow from financing activities	-3.85	-2.95

### **Employees**

As at 31 December 2020 Binder+Co employed 379 people, which is 1.0% fewer than at the end of the 2019 financial year (383 employees).

### **Non-Financial Performance Indicators**

### **Environmental Report**

Binder+Co has its own production capacity with an officially approved waste management concept. Corrosion protection is a major environmental consideration, and in this area the Binder+Co Group falls into line with the official directives, which are adhered to in full. On-site assembly largely takes place without any residues, and the engineering activities completed in the offices of Binder+Co Group companies are of limited environmental relevance.

### **Sick Leave Statistics**

Based on the available working days, the sick leave statistics for all employees show a sickness absence rate of 2.6% (2019: 2.9%). For white-collar workers the rate was 1.7% (2019: 2.3%) and for blue-collar workers 4.9% (2019: 4.3%).

### **Human Resources**

For many years, Binder+Co has pursued a strategy of creating and retaining a core team of highly qualified personnel. Accordingly, against the background of the targeted international growth, training and development programs have been established for employees. For a number of years special internal training measures have been on offer, in the form of the so-called "Specialist Career" course for white-collar staff and the "Workshop Competence" course for blue-collar workers. Both training programs are aimed at broadening the company's personnel base in individual specialist areas, and being able to supply new locations with well-trained specialists who are firmly rooted within the Binder+Co Group. The "Specialist Career" course also provides training for those personnel who are set to take on future managerial tasks inside the Group.

After an annual assessment of the training objectives that have been achieved, further measures are specified for the following year. In 2020 0.4% of the total sum for wages and salaries was invested in implementing employee training and development measures.

The overall educational level of the Binder+Co workforce is good. 25% of the salaried staff are graduates from universities or universities of applied science, while 47% have attended academic secondary school or a vocational college. Of the blue-collar personnel, 72% have been trained as skilled workers and 28% possess a foreman's certificate. The Binder+Co Group also attaches great value to apprenticeships, and currently employs nine apprentices.

### Compliance

Binder+Co's activities are based on respectful relationships with its customers, partners, suppliers and employees.

In addition, the Group undertakes to comply with the national laws in force, such as those combating corruption, promoting sustainability and safeguarding human rights.

#### **Compliance/Adherence to Legal Regulations**

As a manufacturer of machinery and plant, for Binder+Co compliance with all the relevant statutory regulations, especially in a technical regard, is an essential prerequisite for sustained success. That is why the Group also has production plant licences, which are subject to regular audits. Safety at work is also an especially important issue, which is monitored and documented primarily by the assembly and production management at each location. The products themselves are evaluated for their CE conformity by means of a quality management system.

Apart from accreditations according to EN ISO 9001:2015, certification pursuant to SCC\*\*:2011 and EN ISO 1090-1:2009 constitutes a major aspect of Binder+Co's efforts to constantly meet the highest quality standards.

### Expected Group Development

Starting from a strong position as a globally active, innovative technology supplier working in three product areas, the Group's strategy for growth is based on the following four cornerstones: product leadership, market reach, operational excellence and acquisitions.

In addition to EU Europe and selected CIS states, the regional focus of Binder+Co also encompasses South and North America, and Asia, particularly India, China, South Korea, Thailand and Japan. In its core market of Europe, Binder+Co increasingly supplies the customer segments of the recycling industry, industrial minerals and the construction and building supply industry; the Packaging Technology segment, in addition, supplies the feedstuffs industry and the chemical industry. In North and South America the focus is on the recycling industry and mining. In order to intensify business activities in this important market, in 2016 the subsidiary Binder+Co USA, Inc. was founded as a sales and service unit. In Asia, on the other hand, the organization mainly serves the coal mining sector, the steel and iron industry, and the petrochemical industry. Alongside these activities Binder+Co is working to establish itself in the Asian recycling industry. Market access in this region is driven directly through the Chinese subsidiary Binder+Co Machinery (Tianjin) Ltd. In addition, the cooperation with a long-term partner in India has been strengthened and expedited, not just for the processing and packaging technology segments, but also for the environmental technology segment.

The strict travel restrictions that have come as a result of the COVID-19 pandemic have again underlined how critical the core European markets are to the Group. They will be the focus of our activities in the coming years and play a role in the strategy to grow sales. The enhancements to the product range for sensor-based sorting machinery will lead to an increase in the share of sales coming from the Asian, Australian and North and South American markets, primarily in the recycling and mining sectors (2020: 28.1% of total sales revenues). Our target is to increase EBT significantly in 2021 so that it is on a sound qualitative footing.

The restructuring measures implemented in the 2020 financial year, together with the refocusing on innovative core business segments will make it possible for the Binder+Co Group to benefit from a slimmed-down, more flexible structure to react to the more volatile market conditions that have arisen as a result of the pandemic. Our focus will be on ensuring the successful and profitable conclusion of projects, controlling fixed costs as well as pushing ahead with innovative and/or digitalization projects. The current project mix in our order backlog (a healthy balance of systems projects, machine sales and after-sales contracts) and our current product portfolio provides a solid foundation for the efficient use of our production, engineering and project resources.

The extremely positive developments in Comec-Binder S.r.l.'s 2020 business year confirm that the strategy, implemented in 2018, to develop our Italian subsidiary into a center of excellence for wet processing solutions is the right way forward. Synergies will be exploited through establishing ever-closer ties between sales and project management.

Our sales and service subsidiary Binder+Co USA is working on the assumption that the business and political environments in North America will improve from the start of 2021. Our sales and service subsidiary in China, Binder+Co Machinery (Tianjin) Ltd., starts the year as a very lean organization and will concentrate on the profitable service business, as well as on supporting our licensee partner with key components and expertise.

In combination with the expected improvements in the results from its subsidiaries, the Binder+Co Group is aiming to deliver clearly and consistently positive EBT over the next few years.

### Main Risks and Uncertainties

### **General Risk Report**

Binder+Co designs and manufactures single machines and uses combinations of its own and third-party products and purchased parts to build complete systems. Due to the high levels of engineering skills required, this is associated with a variety of technical, legal, managerial and financial risks. For example, amongst other activities, Binder+Co plans and installs sophisticated plant that makes sizeable demands with regard to engineering capacity. Consequently, the accompanying technical risk must also be regarded as above average. Risk recognition and management therefore represent a major aspect of business processes within the Group.

In view of its strong export orientation, Binder+Co invests considerable sums in the expansion of its sales and distribution network. The Group currently supplies its products to more than 90 countries and is thus subject to the general risks of fluctuations in the global economy, which can have a negative effect on the course of business.

Furthermore, the Group is active in a highly competitive sector in which order intake and sales revenues are dependent upon a few individual decisions. Consequently considerable fluctuations may occur, which is however standard for this business area. Moreover, changes to laws and other regulations that lead to stricter requirements, especially in the environmental and human resources sectors, can also generate increased costs and thus lead to reduced income.

Binder+Co endeavours to identify and manage possible risks at an early stage by means of internal and external audits and reviews, and also with the involvement of experts. This is necessary because although Group employees are among the acknowledged specialists in their fields, a residual risk still remains.

In addition, major risks are reported upon in the course of the regular Management Board meetings. A standard report format is in place for the topics of liquidity, finance and ongoing litigation. Decisions are taken and entered into the minutes either directly at project meetings or at Management Board meetings.

The high risk potential requires the continuous further development of risk monitoring. This will continue to concentrate on tender procedures and the internal control system, but will also focus more sharply on the financing risks related to individual projects. In this connection, Binder+Co also examines and evaluates special country risks. In addition, EN ISO 9001:2015 requires certified companies to install comprehensive risk management systems, the effectiveness of which will be examined as a major aspect of future audits.

Binder+Co differentiates between strategic, operational and financial risks in its new risk management system. Once the individual risks allotted to these three categories have been identified and evaluated, measures for risk minimization or prevention are defined and implemented.

Both internal and external risk audits are used to monitor the implementation status and determine the efficacy of the adopted measures, in order that interventions can take place if required. The findings from these internal and external evaluations are included in periodic internal and external reporting.

### Special Risk Report

### **Price Change Risk**

Contracts and agreements with suppliers and customers routinely contain price change clauses, which limit the impact of risks that are beyond the control of the Binder+Co Group. For its part, the Group also endeavours only to conclude flat rate contracts with its suppliers. However, erratic changes in purchase prices and/or the need for an unplanned switch of supplier can exert a negative influence on the earnings situation.

### **Payment Default Risk**

As the Binder+Co Group is dependent upon a small to medium-sized customer base, it seeks to prevent cluster risks. Consequently, it is only in exceptional cases that the Group permits more than 5% of annual sales revenues to be obtained from any single order and/or customer. In addition, Binder+Co limits the payment default risk by means of the appropriate insurance, bank guarantees, or prepayments.

### **Liquidity Risk**

Payment delays or defaults in the case of individual large-scale projects can have a major impact on Group cash flow, and thus entail corresponding risks. Any payment arrears involving the debtors that are most important in value terms are therefore reported on at the regular meetings of the Management Board, and liquidity forecasts are prepared. If necessary, appropriate measures can be taken rapidly to improve the cash flow. Since the end of 2016, Binder+Co has also been using factoring to improve liquidity.

The focus of the measures aimed at minimizing the liquidity risk is on the rolling 12-month financial plan, the regular monitoring of payment flows and the hedging of credit lines.

Apart from securing business operations, Binder+Co's capital management aims to increase the value of the business and create a sound capital basis, which primarily serves to finance Binder+Co's chosen growth course and secure the company's solid dividend policy. In addition, while taking account of the local requirements of Group companies, within the framework of its capital management Binder+Co seeks to adhere to the established Group-wide minimum equity ratio of 30%.

### **Interest Rate Change Risk**

In recent years, the loan interest rate trend has proved to be highly advantageous for Binder+Co. Nevertheless, periodic checks are made to assure optimisation and risk minimisation. Any measures to be taken are agreed between the Management Board and the Finance & Controlling Department.

### **Currency Risk**

As far as possible, the Group tries to transact all foreign business in euros. Where this is not feasible, foreign currency transactions are hedged using measures such as currency futures transactions.

### **Country Risk**

To date, country risk has been of secondary importance for Binder+Co. However, in the medium term the increasing efforts towards internationalisation beyond the EU pose a new risk potential. Nonetheless, at present these risks are still only of secondary significance, owing to the fact that the Binder+Co business model is based on single machine business.

### Research and Development Report

Research and development (R&D) is a central element of Binder+Co's sustainable corporate strategy. The purpose of the research and development activities within the Binder+Co Group is to underpin technological leadership in all Group companies and not just to ensure the technical superiority of its products but to develop them further on an ongoing basis. For this reason, the Binder+Co Group was again intensively involved in developing new products and further developing existing products in the past financial year.

Direct expenditures for R&D have been rising continuously in recent years, with the exception of the 2020 financial year, in which not all projects could be pursued and/or completed as a result of the COVID-19 pandemic. Actual expenditures in 2020 amounted to EUR 1.77m (2019: EUR 2.04m). There are also ongoing R&D projects being carried out together with customers.

In 2020 R&D activities focused mainly on expanding the multifunctionality of existing top products and on developing new products and processes. We view testing in near-real conditions together with our international customers and partners as the cornerstone of our research and development strategy.

BIVITEC e+, which was developed in 2019, offers new solutions for a huge range of different screening applications thanks to its minimal dynamic loads, reduced weight and significantly lower energy consumption. Due to the COVID-19 pandemic, its global launch took the form of an online live stream in June 2020. A group of experts presented the new screening machine and answered questions from the industry sector viewers from around the world.

Great progress has been made in the area of LIBS (Laser Induced Breakdown Spectroscopy) technology. This technology can be deployed in both the sorting of secondary raw materials (waste electrical equipment shredder fraction, scrap metal) as well as of primary raw materials (minerals, ores). Together with the existing XRT technology, this further expands our expertise in the area of metals sorting.

Further advances were made in 2020 in the digital control and networking of machines and plant, with b-connected.

In the area of compost screening, the joint development project with cooperation partners will also continue in 2021, with the objectives of eliminating impurities from compost through both sensor-based processes and the deployment of screening and wind-sifting processes.

Further important development steps were completed in the production of very fine granulates using BUBLON technology. This allows a significant widening-out of the applications in the plastics, inks and varnish industries. As a result of the change in strategy, BUBLON Spheres will in future only be produced in very small quantities. The existing technology will henceforth be deployed in the form of systems projects (shaft design and construction for customers).

## Main Features of the Internal Control and Risk Management System

The structure of Binder+Co's risk management system in its individual business segments is described below. It should be noted that the members of the Binder+Co AG Management Board also exercise executive and supervisory board functions in the Group's operating companies, and therefore, as well as their involvement in transactions requiring approval, they are also directly involved in the operational day-to-day business.

The Management Board is responsible for setting up an appropriate internal control and risk management system with regard to the invoicing process and financial reporting. To this end, both the Management Board and the Supervisory Board have approved binding regulations and directives relating to both the main business risks and the financial reporting process throughout the Group.

The Accounts Department and the integrated financial bookkeeping section report directly to the Management Board. Appropriate organizational measures ensure compliance with the statutory stipulations which require entries into the accounts and other records to be made in full, correctly, punctually and in an orderly fashion. The entire process from purchasing to payment is subject to strict rules and regulations that are intended as a safeguard against any related risks. These measures and rules include the separation of functions, rules on signature authorisation, the fact that signing authority for payments is limited to only a few people, and system-supported audits by means of the software used.

A constant flow of information via standardized, Group-wide financial reporting and the immediate, incidentrelated reporting of significant events keeps the Management Board continuously updated on relevant matters. The Supervisory Board is apprised in at least one meeting per quarter of the current course of business, operational planning and the Group's medium-term strategy. In special cases the Supervisory Board is also provided with information without any delay.

### **Financial Risks**

The monitoring and management of financial risks are integral parts of the accounting and controlling functions throughout the entire Group. Continuous controlling and regular reporting are intended to increase the probability of early recognition of larger-scale risks and the initiation of countermeasures where necessary.

Nonetheless, there is no guarantee that the monitoring and risk control systems are sufficiently effective. The main risks to the positive development of business in the Binder+Co Group in 2020 related primarily to the Group's dependence upon the general economic climate and upon its winning large orders and achieving appropriate sales revenues and margins from the order backlog. The global COVID-19 pandemic, which broke out in 2020, posed unprecedented challenges to the Binder+Co Group. The sudden economic downturn and, above all, the difficulty in predicting when and how the economy will recover made it essential to implement a cost reduction program to hedge against financial risks as best as possible.

In addition, a possible slowing of economic activity in the developing nations represents a further risk to the Group. Such economic weakness could lead to the further delay or to the cessation of projects that are either in progress or the acquisition phase. The cancellation of existing contracts could exert a negative influence on the order backlog of the Binder+Co Group, which in turn could have a negative effect on capacity utilization at the Group's production centers. The complete or partial write-off of goodwill obtained in the course of acquisitions could also impact the Binder+Co Group's results if the business targets for the Group cannot be reached.

Apart from this, there is a constant risk that trade receivables may have to be partially or totally written down. For a large percentage of orders, bank financing and taking out export insurance are employed as hedging against the risk of customer defaults on payment. Nevertheless, individual payment defaults can have a significant negative effect on Group results. As a rule, the risk related to deliveries to countries with an average to high political risk rating is largely hedged.

Interest and exchange rate risks are minimized and controlled by means of derivative financial instruments that consist mainly of currency futures and swaps. In the case of orders invoiced in foreign currencies (mainly in USD and CNY) the net currency position is hedged by concluding futures transactions.

Cash flow risks are monitored with the aid of monthly cash flow reports. Moreover, in order to further reduce financial risks and improve the surveillance, control and evaluation of financial and liquidity items, Binder+Co is constantly improving its treasury guidelines and information systems.

Binder+Co avoids dependency upon a single bank and ensures this independence by only handling certain volumes of all the important financial products (cash and cash equivalents, financial liabilities, financial assets, guarantees and derivatives) through any one bank. Notwithstanding this practice, however, the insolvency of one or several banks would have a significant and negative impact on Binder+Co's results and its equity.

### **Non-Financial Risks**

### Personnel

In the area of personnel, interesting individual development opportunities, performance-related remuneration and focused training programs are important prerequisites for attracting trained and well-qualified employees to Binder+Co. High quality standards during the selection process guarantee that the most suitable candidates are recruited. Moreover, within the framework of successor planning, potential candidates are identified for every key position on the basis of standardized assessments of performance and potential, so that the company has internal personnel available at all times as short- and medium-term replacements. Fluctuations in workload capacity can be counterbalanced throughout the Group by allocating orders to the individual global locations, and locally through the use of temporary personnel.

### Quotations

Quotations are prepared using standardized templates, which have been verified from a commercial and legal perspective. Depending on the level of financial risk, in addition to a commercial check by the company's authorized signatories, an expert group selected by product areas also completes a process-related review. During this technical review a risk analysis is prepared, which forms the basis of additional measures if required.

### **Project Completion**

Projects are delivered by teams headed by a project manager. During regular team meetings and in technical and commercial reviews existing risks are also analyzed, measures are drawn up and reports provided to the executive management, who are informed immediately of any risks that pose a major threat.

### **Innovation and Development**

Rapid changes in market requirements call for constant further development of existing products and the development of new products. Technological changes and the short life-cycles of new products can result in individual development projects failing to be fully amortized. In order to minimize risk prior to the commencement of a development project, relevant market data is collected as far as is possible, the level of difficulty of the development is established through the appropriate cost evaluation and the potential sales volume is estimated. At quarterly meetings, as well as progress reports relating to specific development projects, the management is also provided with a risk report. Any necessary actions are agreed quickly with the Management Board.

## Disclosures Regarding Capital, Shareholdings, Control Rights and the Related Obligations

### **Capital Structure**

As there was no change in the issued capital of Binder+Co AG as compared to the preceding year, nominal capital is reported as EUR 3,750k. This consists of 3,750,000 registered shares with a value of EUR 1.00 each.

### **Qualified Share Ownership**

By the closing date of 31 December 2020, in the course of the transition from no-par bearer to registered shares all bar 622 shares had been returned. Consequently, the shareholders listed in the share register on 31 December 2020 held close to 100% of the shares.

The number of shares issued corresponds to the registered capital. Liaunig Industrieholding AG holds 29.7% of the shares, the Albona Privatstiftung 24.5%, Treibacher Industrieholding GmbH 17.1% and Veit Sorger 6.8%, further core shareholders 15.6%, and management and employees 3.5%. The remaining 2.8% of shares are in free float.

### **Special Control Rights**

No special control rights (which go beyond the control rights derived from the statutory regulations) are known.

### Appointment/Dismissal of the Management Board, Supervisory Board etc.

The Management Board does not know of any non-statutory stipula tions regarding the appointment and dismissal of the Management or Supervisory Boards, or changes to the Articles.

### **Change-of-Control Clauses**

The Management Board knows of no contracts with change-of-control clauses.

### **Compensation Agreements**

No compensation agreements exist between Binder+Co AG on the one hand and the Management Board, Supervisory Board or employees on the other hand in the event of a public takeover bid.

## Binder+Co AG Report According to Austrian Corporate Law

In this section, essential information regarding the parent company of the Binder+Co AG Group is presented as long as it does not differ significantly from the previous information regarding the Group.

If there are no individual statements in the representational section, the above information regarding the Group applies accordingly.

### **Report on Selected Financial Performance Indicators**

### Sales revenues/EBT

At EUR 47.74m (2019: EUR 67.96m), the sales revenues for Binder+Co AG were significantly lower than in the previous year. The main reason for the comparatively high revenues of the previous year was the completion of a glass recycling plant in Norway.

Recording a pre-tax loss of EUR -10.83m, the Group fell a long way short of the previous year's result (2019: EUR 0.34m). While the 2019 result was impacted particularly by the value adjustments on investments totaling EUR -1.51m, the result in 2020 was negatively affected by various one-off, extraordinary expenses which in total amounted to EUR -13.53m. They were: write-down of Group receivables EUR -1.50m, restructuring costs EUR -2.62m, value adjustments on investments EUR -6.56m, and expenditures in conjunction with arbitration proceedings EUR -2.85m.

### **Business Segment Results**

The Processing Technology segment's contribution to total sales revenues in 2020 in accordance with UGB (Austrian Commercial Code) reporting was EUR 24.16m (2019: EUR 27.62m); Environmental Technology's was EUR 22.38m (2019: EUR 37.32m). The other segments recorded sales revenues of EUR 2.20m in 2020 (2019: EUR 3.02m).

Order intake in total amounted to EUR 56.31m (2019: EUR 61.32m). Of this, Processing Technology accounted for EUR 31.14m (2019: EUR 31.35m); Environmental Technology for EUR 23.34m (2019: EUR 27.53m) and the other areas EUR 1.83m (2019: EUR 2.44m).

### **Order Backlog**

The total order backlog in accordance with UGB reporting stood at EUR 36.87m as at 31 December 2020 (2019: EUR 30.46m).

### **Equity Ratio / ROE**

Due to the one-time extraordinary expenses described above, the equity ratio decreased from 32.1% in 2019 to 15.4% in 2020.  $ROE_{_{FBT}}$  amounted to -62.7% (2019: 1.9%).

#### **Working Capital**

Working capital was valued at EUR -2.03m as at 31 December 2020 (2019: EUR 4.98m).

#### **Cash Flow Statement**

Cash flow from the overall result came to EUR -1.99m (2019: EUR 3.88m), from operating activities EUR 4.41m (2019: EUR 1.99m).

At EUR -3.22m, cash flow from investment activities was slightly higher than in 2019 (EUR -3.13m). Cash flow from financing activities came to EUR -1.26m (2019: EUR 0.92m). Cash and cash equivalents as at 31 December 2019 amounted to EUR 0.02m (2019: EUR 0.09m).

#### **Employees**

As of 31 December 2020, the number of employees was 237 (2019: 239).

### Events of Special Significance After the Balance Sheet Date

No events of major importance that could have exerted a significant influence upon the Group occurred between the end of the financial year and the editorial deadline for this report.

In addition, between the closing date of the financial statements and their approval by the Management Board, no events occurred that could have had a material influence upon the (consolidated) financial statements as at 31 December 2020.

### Notes to the Consolidated Financial Statements as at 31 December 2020

### 1. The Company

Binder+Co AG is a company under Austrian law, which has its headquarters in Gleisdorf, Styria and is primarily engaged in the production of machinery, plant and systems for the processing and recycling of bulk goods, as well as their packaging via its subsidiary Statec Binder GmbH. Binder+Co AG and its subsidiaries (subsequently referred to as the "Binder+Co Group") are leading manufacturers of machinery, plant and systems for the processing, environmental and packaging technology sectors.

The Group's international sales network is tailored to serve the branches contained in the three processing, environmental and packaging technology business segments. The main sales markets lie in the regions of Europe, Asia, Australia, Africa and North America.

The company is the ultimate parent company in the Binder+Co Group and has its offices at Grazer Straße 19–25, 8200 Gleisdorf, Austria.

The average number of employees in the Group amounted to 391 in 2020 and 372 in 2019.

At the Binder+Co AG Annual General Meeting held on 12 April 2016, it was agreed that bearer shares be replaced by registered shares. This resolution took effect on 30 July 2016 with entry into the company register. The final trading day for bearer shares in the mid market of the Vienna Stock Exchange was thus 29 July 2016. Following the expiry of the exchange and subsequent invalidity declaration process in February 2017, a total of 3,612 shares were declared null and void. The cancellation of 2,990 shares was suspended up to 31 December 2020. At the balance sheet date, there were 622 shares that have been declared null and void.

Liaunig Industrieholding AG holds 29.7% of the shares, the Albona Private Trust 24.5%, Treibacher Industrieholding GmbH 17.1% and Veit Sorger 6.8%, further core shareholders 15.6%, and management and employees 3.5%. The remaining 2.8% of shares are in free float.

The consolidated financial statements are prepared on the responsibility of the Management Board and are acknowledged by the Supervisory Board.

### 2. Accounting Principles and Summary of the Presentation and Valuation Methods

### **2.1. Accounting Principles**

Pursuant to \$245a Austrian Commercial Code (UGB), the Binder+Co Group consolidated financial statements as at 31 December 2020 were prepared in accordance with the International Financial Reporting Standards ("IFRS" and "IAS") issued by the International Accounting Standards Board ("IASB") as employed in the European Union. In addition, all the binding interpretations of the International Financial Reporting Interpretations Committee ("IFRIC" and "SIC") for 2020 were complied with. Pursuant to \$245a UGB with these consolidated financial statements in line with the IFRS Binder+Co AG has prepared exempting consolidated financial statements according to internationally recognized accounting principles.

### 2.1.1. Notes to the Amended or New IFRS

In comparison with the consolidated financial statements as at 31 December 2019, the following standards and interpretations have changed, or owing to their acceptance into EU law or the coming into effect of the regulation, became binding for the first time:

Standard/Interpretation	Content	Valid from <sup>1)</sup>
Changes to IFRS 3	Definition of a business establishment	01.01.2020
Changes to IAS 1 and IAS 8	Definition of materiality	01.01.2020
Changes to IFRS 9, IAS 39 and IFRS 7	Reform of the reference rates	01.01.2020
Changes to the accounting framework		01.01.2020

1) To be applied to financial years beginning on or after the date stated.

Application of the accounting pronouncements is not yet obligatory and early application to the 2019 financial year did not occur.

Standard/Interpretation	Content	Valid from <sup>11</sup>
IFRS 17	Insurance contracts	01.01.2023
	Classification of liabilities as	
Changes to IAS 1	current or non-current	01.01.2023
	6	

1) To be applied to financial years beginning on or after the date stated.

With the exception of plan assets pursuant to IAS 19, derivative financial instruments and financial assets pursuant to IFRS 9, which are reported at fair value on the balance sheet date, the consolidated financial statements were prepared in accordance with the historical cost accounting principle.

### 2.1.2. Changes to Estimates

In the past financial year, there was a change in the interest rate for severance payments, anniversary bonuses and provisions for pensions. The growth rate and the interest rate used for the impairment test were also adjusted to the current estimates.

### 2.1.3. Methods and Scope of Consolidation

The consolidated financial statements include Binder+Co AG and all the material subsidiaries that it owns entirely, or in which it holds a controlling interest. A controlling interest exists when:

- The right of disposal may be exercised over the subsidiary
- Fluctuating returns from the subsidiary result and/or
- Owing to the right of disposal, the amount of the returns from the subsidiary can be influenced.

Subsidiaries are therefore all companies in which the Group controls financial and business policies. As a rule, a controlling interest is always given when Binder+Co AG holds over 50% of the voting rights in a company either directly or indirectly.

All company combinations are reported using the purchase method of accounting. This involves the netting of the cost of the shares in the acquired subsidiary with the respective pro rata net assets on the basis of the fair value of the acquired assets and debts of the company as at the dates of the transaction and the transfer of control. Costs incurred in the course of the combination are recognized as an expense and reported under "Other operating expenses".

Remaining goodwill is allocated to the respective cash-generating unit and tested on this level with regard to impairment. Pursuant to IFRS 3, negative goodwill is immediately recognized in the income statement.

The share of equity and net income allotted to non-controlling interests is recognized separately in the consolidated balance sheet and income statement.

Companies that were bought or sold during the year are reported upon in the consolidated financial statements from the date of purchase or up to the date of sale.

The financial statements of the subsidiaries are prepared using uniform accounting methods for the same reporting period as that employed for the financial statements of the parent company. Where material, all intra-Group receivables, liabilities and services charges, including intra-Group interim results, are eliminated in full. In line with IAS 12, the necessary tax deferrals are made for temporary differences derived from consolidation.

The consolidated financial statements are presented in thousands of euros (EUR k) in accordance with commercial rounding methods. As a result of the use of automatic calculating machines, differences derived from rounding may occur in the addition of rounded sums and percentages.

As at 31 December 2020 the scope of consolidation included the following companies:

### 2.1.4. Currency Translation

Parent company	Binder+Co AG	Gleisdorf, Austria	
Subsidiaries			
National	Statec Binder GmbH	Gleisdorf, Austria	50.7%
	Bublon GmbH	Gleisdorf, Austria	100.0%
International	Comec-Binder S.r.I.	Badoere di Morgano, Italy	100.0%
	Binder+Co Machinery (Tianjin) Ltd. Binder+Co USA, Inc.	Wuqing Development Area, China Denver, Colorado, USA	100.0% 100.0%

### **Business Transactions in Foreign Currencies**

In the individual financial statements of the consolidated companies, transactions in foreign currencies are translated into the respective functional currency of the company at the exchange rate on the date of the transaction. Exchange rate gains and losses derived from translation at the time of the transaction and the balance sheet closing date are recognized in the consolidated income statement. As a rule, the companies endeavour to complete all international business in euros. Wherever possible, exchange rate risks are hedged by foreign exchange forwards and swaps. The currency risk emanating from the purchase of materials in foreign currencies is reduced by attempts to partially present outgoing invoices to various customers in foreign currencies (USD, CNY).

In the current financial statements, expenses and gains derived from exchange rate differences are netted and only the surplus is reported. The currencies involved are those for which the amounts of claims and obligations offset each other (so-called closed currency items from coverable assets and liabilities). The amount of the foreign currency gains/expenses recognized in the income statement for the financial year 2020 totalled EUR –254k (2019: EUR –39k).

As at the balance sheet date, no forward exchange contracts were open (2019: USD 2,046k with a market value of EUR - 59k).

### Translation of Individual Financial Statements in Foreign Currencies

The group currency is the euro and in line with IAS 21, annual financial statements prepared in foreign currencies are included in the consolidated financial statements and translated into euros in accordance with the functional currency principle. The functional currency for all companies is the respective national currency in which they independently transact their business in a financial, economic and organizational regard. Assets and debts are translated at the mean exchange rate on the balance sheet date and income statement items at the mean exchange rate for the financial year. Equity is measured at the historic exchange rate on the date of initial consolidation.

The euro exchange rates used for translation are contained in the following table:

### **2.2. Accounting and Valuation Principles**

During the preparation of the consolidated financial statements, amendments to existing IAS and IFRS and

		Closing date rate		Average exchange r	
Currency	ISO-Code	31 Dec. 2020	31 Dec. 2019	2020	2019
US-dollar	USD	1.2301	1.1204	1.1410	1.1186
Chinese renminbi yuan	CNY	8.0250	7.8155	7.8995	7.7163

Source: USD UniCredit Bank Austria AG; CNY: State Administration of Foreign Exchange.

interpretations, as well as newly issued standards and interpretations were accounted for where these had been published in the Official Gazette of the European Union prior to 31 December 2020 and had taken effect by this date.

Where necessary, the figures for the previous year were adjusted in accordance with IAS 8.

### 2.2.1. Goodwill from Company Combinations

Goodwill is recognized in accordance with IFRS 3 and subjected to an impairment test both annually and when events or changed circumstances indicate that impairment may have occurred.

In line with IFRS 3, following reassessment of the identifiable assets and debts, negative goodwill is recognized immediately in the income statement.

### 2.2.2. Intangible and Tangible Assets

Purchased intangible assets are recognized at the cost of acquisition net of scheduled and extraordinary depreciation and amortization.

In the case of internally generated intangible assets, the period during which these are accrued is divided into a research and development phase. Costs incurred during the research phase are immediately recognized as an expense. Development costs also represent period expenses. However, these are only capitalized when future financial inflows can be expected which above and beyond the normal costs, will also cover the related expenditure on development. Furthermore, all the stipulations contained in IAS 38 must be fulfilled cumulatively. Internally generated intangible assets are recognized at the cost of production, net of scheduled and extraordinary depreciation and amortization.

Tangible assets are recognized at the cost of acquisition or production net of accumulated scheduled depreciation and amortization costs.

The production costs of internally generated intangible and tangible assets consist of all direct costs and an appropriate portion of production overheads.

Borrowing costs that can be classified as relating directly to the purchase, construction or manufacture of qualified assets, are capitalized as part of the acquisition costs. All other borrowing costs are recognized as an expense in the period in which they occur. No borrowing costs were capitalized during the 2020 financial year (2019: EUR 0k).

Public grants for assets are deducted from the cost of acquisition. Cost contributions are reported in accordance with the related expenses and recognized in the income statement on an accrual basis as "Other operating income".

Expenditure on an asset in subsequent periods is only capitalized when it results in a considerable enhancement of the future economic benefit associated with the item, e.g. through additional applications, or a significant prolongation of useful life.

The depreciation and amortization of intangible assets and property, plant and equipment occurs on a straight-line basis in accordance with the expected useful economic life of the respective item. Assets acquired in the financial year are written down pro rata temporis from the month in which the asset becomes available. The useful lives assumed for the calculation of the rates of depreciation and amortization remained unchanged over the preceding year and were as follows:

	Useful life in years	
	From	То
Intangible assets		
Capitalized development costs	5	10
Industrial property rights	5	10
Tangible assets		
Land and buildings, including buildings on non-owned land	4	50
Plant and machinery	3	15
Other plant, factory and office equipment	1	10

The residual carrying values and useful economic life periods are examined regularly and adjusted where necessary.

Individual assets with an acquisition cost of less than EUR 800 (low-value assets) are fully written down in the year of acquisition and reported as disposals in the non-current assets movement schedule.

### 2.2.3. Leased and Rented Assets

As already stated in the chapter 2.1.1. the Binder+Co Group applied IFRS 16 for the first time on January 1, 2019. Accordingly, operating leases previously classified under IAS 17 are now recognized as a lease liability and measured as the cash value of the remaining lease payments, discounted at the lessee's marginal borrowing cost rate. For leases previously classified as finance leases, the book value of the leased asset in accordance with IAS 17 - prior to the first application of IFRS 16 - and the book value of the lease liability in accordance with IFRS 16 are recognized. The valuation principles of IFRS 16 are only applied thereafter. As of December 31, 2020, there were liabilities from leases to the amount of EUR 1,293k, which were classified as finance leases based on the first-time application of IFRS 16 (2019: EUR 1,387k).

The Binder+Co Group made use of the following facilities when applying IFRS 16 for the first time:

- Applying a single discount rate to a portfolio of similar leases
- Leases are reported as short-term leases when they have a remaining term of less than 12 months or the replacement value of the leased property is less than USD 5k

Within the Binder+Co Group the decision was made not to re-examine leasing contracts concluded before the transition date neither to determine whether a contract is or contains a leasing agreement before it was applied, but to retain the previous decision made under IAS 17 and IFRIC 4.

### 2.2.4. Value Impairments

Assets (except inventories and deferred tax assets) are tested on the respective balance sheet date in order to ascertain whether indications of impairment exist. In the case of goodwill, even if there are no such indications a test is completed shortly before each balance sheet date.

In general, impairment tests on goodwill, other intangible and tangible assets are based on estimated future discounted net cash flows, which are to be anticipated from the continued use of an asset and its disposal at the end of service life. Impairment may be caused by factors such as lower sales revenues and resultant smaller net cash flows, as well as changes to the discount factors employed. The attainable amount is estimated for the individual assets and should this prove impossible, the superordinated cash-generating unit is assessed.

Should the reason for a past impairment loss no longer exist, except in the case of goodwill, the amortized costs of acquisition and production are reversed.

In line with IFRS 36, goodwill was subjected to an impairment test, which in the 2019 financial year did not result in an impairment (2019: EUR 0k).

### **2.2.5.** Financial Assets

The Binder+Co Group only holds financial assets that are measured at amortized cost or at fair value through profit or loss. The financial assets contain non-current asset securities.

Pursuant to IFRS 9, the securities held to cover pension provisions are carried at fair value. Changes in value are recognized in the income statement. With effect from 2018, non-current asset securities are assigned to the category "fair value through profit and loss". There was no depreciation of securities held as fixed assets in the 2020 financial year (2019: EUR 7k).

### 2.2.6. Deferred Taxes

Deferred taxes are determined according to the balance sheet liability method for all temporary differences between the tax value and the IFRS valuation of assets and debts. In addition, the feasible tax advantage to be gained from existing deferrals is included in the calculation. Temporary differences subject to tax that derive from the initial reporting of goodwill are excluded from these comprehensive deferments.

Tax accruals are only reported when it can be assumed with sufficient certainty that the related tax benefit is realizable. The determination of accruals is based on the income tax in the respective country at the date of the probable reversal of the value difference.

Tax deferrals that relate to items not recognized in the income statement are booked in similar fashion. Reporting takes place in line with the underlying business transaction as "Other income".

Deferred tax assets and debts are offset when the deferrals relate to the same fiscal authority.

### 2.2.7. Inventories

Inventories are recognized at the lower of the cost of acquisition or production, or net realizable market value (market price) at the balance sheet date. The net realizable market value represents the sales price attainable in standard business transactions, less the outstanding production costs and necessary operating expenses.

Acquisition costs are calculated using the sliding average cost method.

The valuation of unfinished and finished products takes place at the cost of manufacture. This contains all individual costs, as well as a reasonable percentage of production overheads. General administration and sales costs, as well as interest on borrowings are not included in the cost of manufacture.

### 2.2.8. Trade Receivables

Trade receivables are reported at nominal value less write-downs for recognizable, individual risks.

Interest-free and low-interest receivables are discounted where necessary. Receivables in foreign currencies are recognized at the exchange rate on the balance sheet date and in the case of hedged exchange rates with the hedged rate.

As a rule, deposits received from customers in the course of open construction orders (warranty bonds) are called in by means of bank guarantees.

Credit losses on trade receivables are calculated using a value adjustment table. The value adjustment rates are set according to dunning levels (depending on the number of days payment is overdue). Further criteria, such as the geographical region, type of customer, credit rating and safeguards through letters of credit or credit insurance, are also factored in. The value adjustment rates are initially based on historic default rates. The historic default rates may be adjusted, depending on the forward-looking information available. The historic default rates are reviewed at every balance sheet date and changes to the forward-looking estimates analyzed.

The judgement of the correlation between historic default rates, forecast economic framework conditions and expected defaults represents a material estimate. The defaults experienced by the Group in the past and the forecast for economic framework conditions may not be representative of actual defaults by customers in the future.

### 2.2.9. Manufacturing Contracts/Revenue from Contracts with Customers

Contracts are analyzed to ascertain if they come under the provisions of IFRS 15. A check is also made to determine whether it is possible/necessary to collate contracts. The individual performance components are then identified and the transaction price is assigned to them. The allocation of the transaction prices for multi-component transactions is performed in relation to the individual realizable values of the goods or services at contract formation. The individual realizable value is the price at which an entity would be able to sell a customer a good or service separately. If no individual realizable values are observable, they are estimated.

A check is then made of the period in which the revenues should be recognized. Revenues from contracts with customers are recognized in a given period if they meet the prerequisites of IFRS 15. The anticipated order revenues are recognized as revenue according to the stage of completion attained. The stage of completion is determined on the basis of the cost incurred to date relative to the total expected cost (cost-to-cost). In exceptional cases, and when the order progression is more in line with it, the determination of the stage of completion is based on other methods (e.g. output-oriented). Add-ons are recognized if they will in all probability be accepted by the customer and if they can be measured reliably. Where the outcome of a manufacturing order cannot be reliably estimated, the order revenues are limited to the sum of the order costs already incurred. If it is probable that the sum of the order costs will exceed the order revenues, the impending loss is immediately reported in its entirety as an expense.

Costs incurred to obtain the order are also capitalized and spread over the term of the contract.

Prepayments received are deducted from the receivables derived from contracts with customers as per IFRS 15 (contractual assets). Should the resultant balance be negative, it is carried as a liability.

### **2.2.10. Other Receivables and Assets**

Other receivables are classified at amortized cost and at their nominal value less provisions for possible defaults.

### 2.2.11. Cash and Cash Equivalents

Cash and cash equivalents consist of cash and credits at banks.

### 2.2.12. Obligations in Respect of Employees

### **Pension Obligations**

Under individual agreements, the Binder+Co Group has commitments to pay pension benefits in respect of a beneficiary. These performance related obligations are not matched by any appropriated funds and are therefore reported in their entirety as a provision. These obligations consist exclusively of pensions payable to retired employees or their widows.

The amount of the provision required is calculated for the respective balance sheet date on the basis of an actuarial report and takes into account the regulations relating to such calculations contained in the amended version of IAS 19.

The calculation of entitlements as at 31 December 2020 and 2019 is based on the following assumptions:

	2020	2019
Interest rate	1.0%	1.0%
Pension increases	1.5%	1.0%
Life expectancy	AVÖ 2018-P	AVÖ 2018-P

Any difference between the amounts of the provisions as calculated in advance on the basis of the above assumptions and the actual amounts ("actuarial gain/loss") are recognized in accordance with the amended version of IAS 19.

### **Severance Benefits Obligations**

In accordance with Austrian labour law, the company is obliged to make specified severance payments to employees who joined the company before 1 January 2003 and whose employment is terminated by notice or retirement. Employees who leave voluntarily, or are dismissed for good cause, are not entitled to such payments. Severance payments are dependent upon the number of years of service and remuneration at the severance date. They range between two and twelve monthly salaries. A provision is formed for this obligation.

Italian law (Art. 2120 of the Codice Civile) foresees that in every case employees have a claim to severance pay (TFR) at the end of the employment relationship. The TFR is established through the addition of remuneration (including payments in kind) and the division of this amount by a factor of 13.5 for every year of company service. This amount is raised annually by 1.5% plus 75% of the increase in the consumer price index.

The provision is calculated using the projected unit credit method through the aggregation by means of actuarial principles of the current value of future payments over an employee's projected period of employment. In line with IAS 19 (R 2011), the effects on value of changes to the interest and pension parameters (actuarial gains and losses) are recognized directly in equity during their year of origin. The calculation is carried out by an actuary for each balance sheet date.

The calculation of entitlements as at 31 December 2020 and 2019 is based on the following assumptions:

	2020	2019
Interest rate	1.0%	1.0%
Increases in remuneration	3.0%	3.0%
Pensionable age for women	60 <sup>1)</sup>	60 <sup>1)</sup>
Pensionable age for men	65 <sup>1)</sup>	65 <sup>1)</sup>
Life expectancy	AVÖ 2018-P	AVÖ 2018-P

<sup>1)</sup> Taking into account the interim stipulations of the 2003 pension reform. The increase in the age limit for retirement pensions for female retirees from 2024 is accounted for. For Comec-Binder S.r.l. the end of the 62nd year has been adopted as the pensionable age.

Austrian employment relationships that commenced as agreed contractually after 31 December 2002 are subject to the provisions of a new severance payment scheme. This amended system stipulates that for every month of an employment relationship and certain non-contributory periods, the employee receives a vested entitlement to benefit, irrespective of length of service and the reason for the termination of employment. This represents a contribution-oriented scheme, in which the funds required to cover the obligation are transferred to an employees' severance pay and pension fund. The contributions to the employees' severance pay and pension fund totalled EUR 250k (2018: EUR 242k) and are recognized under the expenses for severance benefits.

### **Other Long-Term Obligations in Respect of Employees**

The Binder+Co Group has obligations under collective bargaining agreements to pay long-service bonuses to employees, who achieve a certain specified length of service (from 25 years onwards). A provision was made for this obligation.

Basically, this provision is calculated using the same methods and assumptions as those utilized for severance payments obligations, with the difference that depending on length of service, a reduction of up to 16.2% (2019: up to 16.2%) is applied to reflect personnel fluctuations. Furthermore, and pursuant to IAS 19 (R 2011), the actuarial gains and losses emanating from the provision for long-service bonuses are recognized immediately in the income statement.

### 2.2.13. Other Provisions

Other provisions are recognized when the company is subject to a legal or actual obligation to a third party as a result of a past event and it is probable that this obligation will result in an outflow of resources. The provision sums are based on the best estimates possible at the time that the annual financial statements are prepared. Where the amount cannot be reasonably estimated, no provision is made. Where the present value of the provision calculated according to a market interest rate differs materially from the nominal value, the present value of the obligation is recognized.

### 2.2.14. Taxes

The amount recognized as an income tax expense for the financial year consists of the income tax payable on taxable income for the individual companies using the applicable rate of corporate income tax (actual taxes) in the respective country, together with adjustments to accrued and deferred taxation.

Binder+Co AG is the lead company for taxation of the Binder+Co Group in Austria. The group members have undertaken to pay the corporation tax due on their profits to the lead company. Losses made by group members are treated as internal Group losses carried forward and are offset by profits made at a later date. Upon leaving the Group, a group member will be compensated for any of its losses transferred to the lead company and not yet offset with profits. In accordance with the tax compensation agreement, Binder+Co AG records the corporation tax sums of the group members as income.

With an agreement dated 16 December 2013, a fiscal company group was formed in accordance with §9 KStG (Austrian Corporation Tax Act) between Binder+Co AG as the lead company pursuant to §9 Para. 3 KStG and Bublon GmbH as the group member pursuant to §9 Para. 2 KStG. The Group came into effect from the tax assessment for the 2013 financial year.

The following companies are also members of the Group in line with §9 KStG, but as foreign corporate enterprises are not included in tax equalisation pursuant to §9 Para. 8. line three KStG.

• Comec-Binder S.r.I., 31050 Badoere di Morgano (TV), Italy

Within the scope of the group, the taxable results of Bublon GmbH are taxed at Binder+Co AG level. As far as the international members of the Group are concerned, only tax losses of the respective lead company are realized, which in subsequent years are then subject to a deferred tax obligation in line with §9 Para. 6. Clause 6. KStG.

The calculation of tax distribution takes place on the basis of the contribution method. Accordingly, the lead company either burdens the group member with a charge or provides an appropriate credit.

With effect from 1 March 2014 only those foreign group members that are based in EU member states or in states with which Austria has comprehensive administration assistance arrangements can be included in the group.

The current income tax rates applicable to the Binder+Co Group are as follows:

- Austria: 25.0%
- Italy: 24.0%
- China: 25.0%
- USA: 21.0%

### 2.2.15. Financial Liabilities

In line with IFRS 9, except for derivative financial instruments, the Binder+Co Group categorizes financial liabilities as "Other financial liabilities"; and the liabilities are initially recognized at fair value less the directly allocable transaction costs and subsequently at amortized cost. Should the amount of repayment be lower or higher, a write-down or write-up takes place in accordance with the effective interest method.

The financial liabilities of the Binder+Co Group comprise financial loans, trade payables and other liabilities.

### 2.2.16. Contingent Liabilities

Contingent liabilities consist of possible or existing obligations, where a resource outflow is unlikely. They are not included in the consolidated balance sheet, but are reported in the notes.

### 2.2.17. Income Realization

Income from deliveries is realized when all the main risks and opportunities derived from the supplied item have been transferred to the purchaser (completed contract method). Income from services unrelated to a complete project is realized to the extent of the services provided on the balance sheet date. As far as income realization in connection with order completion is concerned, reference should be made to the relevant notes in item 2.2.9.

### 2.2.18. Financial Expenses and Income from Financial Investments

Financial expenses include the interest and interest-like expenses attached to borrowings and financial leasing transactions, as well as losses from the disposal or unscheduled write-down of financial assets.

The income from financial investments includes the interest, dividends and similar income derived from financial investments and spending on financial assets, as well as gains on the disposal and write-up of financial assets.

Interest is deferred over time using the effective interest method. Dividends are reported when a legal entitlement to payment arises on the part of the shareholders.

### 2.2.19. Research and Development Costs

All research costs are recognized as an expense. Development costs are subject to obligatory capitalization only when all the following preconditions are demonstrated and cumulatively fulfilled:

- The technical realizability of the completion of the intangible asset makes possible its availability for internal use or sale.
- The intention to complete the intangible asset and the ability to use or sell it both exist.
- The asset will generate a future economic benefit.
- Resources for the completion of the intangible asset are available.
- The expenditure attributable to the intangible asset during its development can be reliably determined.

As at 31 December 2020, development costs amounting to EUR 969k (2019: EUR 1,219k) were capitalized in the consolidated financial statements.

During the 2020 financial year, total research and development costs amounted to EUR 1,769k (2019: EUR 2,038k).

### 2.2.20. Risk Management

The monitoring and management of financial risks constitute integral elements of accounting and controlling within the entire Binder+Co Group. Ongoing controlling and regular reporting are intended to increase the likelihood of the early recognition of larger-scale risks and the initiation of countermeasures where necessary. Nonetheless, there is no guarantee that the monitoring and risk control systems are sufficiently effective.

The main risks to the business development of the Binder+Co Group in 2020 related primarily to a dependency upon the general economic trend, the receipt of large orders and the attainment of appropriate sales revenues and margins from a high order backlog. In addition, during the completion of orders further material risks derive from unexpected price increases and problems related to the achievement of the guaranteed performance parameters of plant and machinery supplied by Binder+Co AG.

The financial difficulties of individual eurozone countries and the continuation of the testing overall economic situation also constitute a risk with regard to the financial development of the Binder+Co Group. In addition, a possible slowing of economic activity in the developing nations represents a further risk. Such economic weakness could lead to the delay or cessation of projects that are either in progress or the acquisition phase. The cancellation of existing contracts may also exert a negative influence on the order backlog of the Binder+Co Group, which in turn can have a negative effect upon the use of capacity at the group's production centres.

The complete or partial write-off of goodwill obtained in the course of acquisitions could also impact the Binder+Co Group's results if the business targets for these companies cannot be reached.

Apart from this, there is a constant risk that trade receivables may have to be partially or totally written down. For the majority of orders, bank hedging and the conclusion of credit insurance reduce the risk of customer defaults on payments. However, individual payment defaults can have a materially detrimental effect on group results. As a rule, the risk related to deliveries to countries with an average to high political risk rating is largely hedged.

Owing to the basic Binder+Co Group principle that all international transactions take place in euros, interest and currency exchange rate risks play a subordinate role. In those exceptional cases where business is not concluded in euros, the risk is minimized and controlled by the use of derivative financial instruments and especially foreign exchange forwards and swaps. In the case of orders invoiced in foreign currency, the net currency positions are hedged through the conclusion of forward transactions. Cash flow risks are monitored through monthly cash flow reports. Moreover, in order to further reduce financial risks and improve the surveillance, control and evaluation of financial and liquidity items, the Binder+Co Group is constantly improving its treasury guidelines and information systems.

Risks to the Binder+Co Group derived from interest rate changes relate primarily to current borrowings subject to variable interest, whereas non-current borrowings within the framework of participation and investment financing are hedged by means of fixed interest agreements.

Had interest rates been 50 basis points higher/lower and all other variables remained constant, the consolidated net profit for the financial year ending on 31 December 2020 would have decreased by EUR 70k or risen by EUR 84k (2019: decrease of EUR 90k/increase of EUR 92k). These figures can be traced mainly to the interest risks derived from borrowings subject to variable interest rates.

The Binder+Co Group avoids dependency upon a single bank. Therefore, to ensure independence only a certain volume of all important financial products (cash and cash equivalents, financial liabilities, financial assets, guarantees and derivatives) is handled respectively with only one bank. Despite this approach, the insolvency of one or several banks would have a considerable negative impact upon Binder+Co Group results and equity. The primary aim of capital controls within the Binder+Co Group is to ensure that apart from the availability of the liquidity required to underpin business activities and maximize shareholder value, appropriate credit-worthiness and a sufficient equity ratio can be maintained.

The Binder+Co Group controls its capital with the help of the net financial debt/EBITDA key indicator and the equity ratio. Net debt incorporates non-current and current bank borrowings less cash, cash equivalents and bank balances. Equity consists of issued shares, capital reserves, revenue reserves and other reserves (foreign currency differences) as well as the stocks of non-controlling interests.

At a maximum, the net financial debt/EBITDA key indicator should amount to 3.25 and may only be exceeded for a limited period.

In the period under review the two key indicators developed as follows:

TEUR	2020	2019
Schulden <sup>1)</sup>	17,819	19,230
Barmittel und Bankguthaben	-3,109	-2,192
Nettoschulden	14,710	17,038
EBITDA	4,684	8,777
Nettoschulden/EBITDA	3.1	1.9
Eigenkapitalquote	27.9%	31.1%

<sup>1)</sup> Schulden sind definiert als lang- und kurzfristige Bankverbindlichkeiten.

### 2.2.21. Estimates

During the preparation of the consolidated financial statements in line with generally recognized IFRS accounting and valuation methods, the management must make estimates and assumptions, which can affect the reported values of assets and liabilities and other obligations on the balance sheet date, as well as those of income and expenses for the year under review.

The following assumptions create a not inconsiderable risk, as they could lead to a major adjustment of the assets and debts in the subsequent financial year:

#### Value Impairment of Intangible and Tangible Assets

In general, impairment tests on goodwill, other intangible and tangible assets are based on estimated future discounted net cash flows, which are to be anticipated from the continued use of an asset and its disposal at the end of service life. Impairment may be caused by factors such as lower sales revenues and resultant smaller net cash flows, as well as changes to the discount factors employed.

### **Manufacturing Contracts/Revenue from Customers**

The assessment of manufacturing contracts for which the revenues are recognized in a specific period, up to the conclusion of the project – especially with regard to the reporting of supplements, the amount of the deferred order income in line with the percentage of completion method and the estimation of the probable contractual income – are all based on expectations in relation to the future development of the corresponding orders. Changes can lead to asset value adjustments and have a major influence on the results in subsequent periods.

### **Provisions for Warranties**

In the case of concluded projects, the Binder+Co Group continues to be subject to legal or contractually agreed obligations regarding the correction of defects or damage. Should a known, concrete warranty problem arise, provision is made to the amount of the probable claim. This represents an estimate of future expenses and can deviate from the actual requirement for correction.

### **Provision for Litigation Risks**

The results of litigation can only be predicted with limited certainty. However, where these are estimable, appropriate provisions were made in the consolidated financial statements. The actual results of litigation can deviate from these estimates.

### **Obligations to Employees**

The actuarial calculation of pensions, severance payments and long-service bonuses is based on estimates regarding discount factors, increases in remuneration and life expectancy tables. Changes in the parameters as a result of shifts in the economic and/or demographic framework can lead to larger or smaller provisions and expenditure on human resources.

### **Deferred Taxes**

The calculation of tax deferrals takes place on the basis of the tax rates that according to the current legal situation will apply when the temporary differences again even out. However, tax rate changes can necessitate modifications regarding the deferred taxes that have to be taken into account.

### 2.2.22. Adjustments to the Accounting and Valuation Methods

Basically, the accounting and valuation methods employed on 31 December 2019 were retained.

### 2.2.23. Details of subsidiaries that are not 100% owned in which substantial non-controlling shares are held

Name of the subsidiary	Reg. office		n and voting t rate of the Illing shares	Result appo to the non-c		Cumulative nor	n-controlling shares
		31 Dec. 2020	31 Dec. 2019	2020 EUR k	2019 EUR k	31 Dec. 2020 EUR k	31 Dec. 2019 EUR k
Statec Binder GmbH	Gleisdorf	49.3%	49.3%	700	983	6,374	5,674
Total no. of non-contro	olling shares					6,374	5,674

Binder+Co AG participates directly in Statec Binder GmbH with a 50.7% shareholding.

A summary of the financial information in respect of the Group's subsidiaries in which substantial non-controlling shares are held can be found below. The summarized financial information corresponds to the amounts of intra-Group eliminations.

EUR k	31 Dec. 2020	31 Dec. 2019
Short-term assets	9,297	12,300

Carrying amount as at 31 Dec 2018	6,725	1,286	746	0	8,757
Carrying amount as at 31 Dec 2019	6,590	1,237	746	0	8,573

The continuing losses at Bublon GmbH amidst an increasing lack of planning security due to the COVID-19 pandemic led to a change in strategy, with the result that in future the company will only concentrate on selling Bublon production plants. This means a write-down of all fixed assets connected with the production of Spheres at Bublon GmbH. Where capitalized development costs are concerned, depreciation sums of EUR 912k and EUR 206k for industrial property rights can be attributed to this change.

The recognized goodwill derives from the company combination in the Comec-Binder S.r.I. subsidiary (asset deal) from 2011. This subsidiary is defined as a cash-generating unit for the recognized goodwill.

The valuation process for the determination of the amount that can be attained in this regard is oriented towards company valuation principles (discounted cash flow method). The estimated future cash flows are extrapolated from the planning data for the coming five years approved by the Management Board, which includes previous results and best estimates regarding future developments. In line with the long-term growth forecasts for the branch, a 1.9% (2018: 0.5%) growth deduction and hence an increase in the capital cost rate, is taken into account for the discounting of the cash flows following the detailed planning period. The discount interest rate is determined on the basis of a weighted capital cost rate that is standard in the branch and amounts to 7.5% (2018: 8.4%). The value thus established represents a value in use, which is compared to the carrying value. The impairment test showed no impairment requirement.

The surplus of EUR 1.390k between the value in use and the carrying value would be cut to zero, either through a reduction in the cash flow from the fifth planning year by approximately 19.3% (2019: 42.8%), or an increase in the discount rate to 8.9% (2019: 11.9%). Goodwill carrying values were allocated to the subgroups as follows:

EUR k	2020	2019
Comec-Binder S.r.I.	746	746

### **3.2. Tangible Assets**

During the 2020 financial year, tangible assets developed in the following manner:

EUR k	Land and buildings	Plant and machinery	Other plant, factory and office equipment	Prepayments made and plant under construction	Total
Acquisition costs					
As at 31 Dec. 2019	54,533	10,442	7,951	1,249	74,175

Carrying amount as at 31 Dec. 2020	35,291	2,148	2,040	11	39,490

During the 2019 financial year, tangible assets developed in the following manner:

EUR k	Land and buildings	Plant and machinery	Other plant, factory and office equipment	Prepayments made and plant under construction	Total
Acquisition costs					
As at 31 Dec. 2018	53,799	5,797	7,589	2,525	69,710
Transfers	20	4,036	70	-2,474	1,652
Additions	714	636	543	1,198	3,091
Disposals	0	-27	-257	0	-284
Currency translation	0	0	6	0	6
As at 31 Dec. 2019	54,533	10,442	7,951	1,249	74,175

### Accumulated amortization

As at 31 Dec. 2018	20,322	4,116	5,734	0	30,173
Transfers	0	-3	5	0	2
Additions	1,210	1,045	617	0	2,872
Disposals	0	-22	-252	0	-274
Currency translation	0	0	2	0	2
As at 31 Dec.2019	21,532	5,136	6,106	0	32,774
Carrying amount as at 31 Dec. 2018	33,477	1,681	1,855	2,525	39,538
Carrying amount as at 31 Dec. 2019	33,001	5,306	1,845	1,249	41,401

The amortization figures for plant and machinery includes EUR 2,163k and EUR 18k for other plant, factory and office equipment relating to the cessation of Spheres production at Bublon GmbH.

The carrying amounts for fixed assets as per IFRS 16 include EUR 821k (2019: EUR 1,357k) of usage rights.

Existing leasing relationships were measured at the present value of the remaining lease payments and discounted at the lessee's marginal borrowing cost rate of 2.5% and recorded as a leasing liability. Recognition of leasing liabilities and of capitalized rights of use continued in the same way in 2020, leading to the following carrying amounts for individual items:

EUR k	31. Dec. 2020	31. Dec. 2019
Usage rights		
Plant and machinery	240	1,151
Other equipment, factory and office equipment	581	206
Total	821	1.357

EUR k	31. Dec. 2020	31. Dec. 2019
Leasing liabilities		
Current	550	490
Non-current	743	897
Total	1,293	1,387

The allocations to the rights of use during the financial year 2020 amounted to EUR 467k (2019: EUR 189k) and are shown under additions. The depreciations regarding the capitalized usage rights amounted to EUR 563k (2019: EUR 484k). In addition, there was an extraordinary write-down of EUR 439k for the test system leased for Bublon in 2017 as a result of the change in strategy described above.

Payments for short-term leases or leases that are based on a small asset are recognized as an expense on a straight-line basis categorized in profit or loss. Short-term leases are leases considered with a (remaining) term of up to 12 months and are mainly affecting office rents. Assets of low value mainly refer to IT equipment.

Obligations from operating rental and leasing contracts mainly apply to items of operating and office equipment and are listed under "3.22. Other operating expenses ".

The outward flow of liquid funds from rental and leasing relationships amounted to EUR 1,055k in the financial year 2020 (2019: EUR 1,027k), of which EUR 458k (2019: EUR 514k) was recognized directly as expenses and EUR 597k (2019: EUR 513k) related to leasing obligations capitalized in accordance with IFRS 16. In 2020, the calculated interest was EUR 37k on the capitalized leasing obligations in accordance with IFRS 16 (2019: EUR 38k).

With the exception of the change in strategy for Bublon GmbH, there were no indications of impairment in the 2020 reporting year; consequently, no impairment test was carried out.

### **3.3. Financial Assets**

During the 2020 financial year, financial assets showed the following movements:

	Participtions			
EUR k	companies	Securities	Other loans	Total
Acquisition costs				
As at 31 Dec. 2019	0	223	0	223
Additions	0	0	0	0
Disposals	0	0	0	0
Currency translation	0	0	0	0
As at 31 Dec. 2020	0	223	0	223
Accumulated amortization				
As at 31 Dec. 2019	0	7	0	7
Additions	0	0	0	0
Disposals	0	0	0	0
As at 31 Dec. 2020	0	7	0	7
Carrying amount as at 31 Dec. 2019	0	216	0	216
Carrying amount as at 31 Dec. 2020	0	216	0	216

During the 2019 financial year, financial assets showed the following movements:

	Participtions in associated			
EUR k	companies	Securities	Other loans	Total
Acquisition costs				
As at 31 Dec. 2018	0	223	0	223
Additions	0	0	0	0
Disposals	0	0	0	0
Currency translation	0	0	0	0
As at 31 Dec. 2019	0	223	0	223
Accumulated amortization				
As at 31 Dec. 2018	0	0	0	0
Additions	0	7	0	7
Disposals	0	0	0	0
As at 31 Dec. 2019	0	7	0	7
Carrying amount as at 31 Dec. 2018	0	223	0	223
Carrying amount as at 31 Dec. 2019	0	216	0	216

The securities consist of shares in various investment funds, which serve to cover the provisions for pension obligations under \$14 and 116 of the Austrian Income Tax Act (EStG).

### **3.4. Deferred Taxes**

Temporary differences between the valuations in the IFRS consolidated financial statements and the respective taxation valuation have the following effect on the tax deferrals recognized in the balance sheet:

EUR k	31 Dec. 2020	31 Dec. 2019
Accrued differences		
Non-current assets	445	136
Current assets	146	67
Provision for severance payments	623	705
Provision for pension obligations	15	15
Interest	352	384
Other provisions	245	591
Liabilities	321	342
Loss carryforwards	4,034	2,105
	6,181	4,345
There of non-capitalized		0
Netting of tax accruals and deferrals	-2,965	-2,456
Tax accruals	3,216	1,889
Accrued expenses and deferred income		
Non-current assets	1,836	2,405
Current assets	1,279	1,081
Provision for severance payments	0	15
Other provisions	31	88
Liabilities	0	0
Payment of tax on foreign losses within the framework of Group taxation	0	0
	3,146	3,589
Netting of tax accruals and deferrals	-2,965	-2,456
Tax deferrals	181	1,133
Provision for tax deferrals (net)	3,035	756

As a result of current fiscal regulations, it may be assumed that the differences resulting from retained earnings between the tax participation and the pro rata equity of the subsidiaries that are included in the consolidated financial statements will remain generally tax free. Therefore, no tax deferrals were made in this regard.

The tax deferral on loss carryforwards was capitalized to the extent that this can probably be netted against future gains on taxation. According to current legal statutes there are no temporal limits regarding the realization of loss carryforwards, with the exception of China, where losses lapse after five years. No capitalized losses of Binder+Co Machinery (Tianjin) Ltd. were depreciated in the 2020 financial year.

Income taxes comprise the following components:

EUR k	2020	2019
Current income tax expense	730	958
Change in accrued and deferred taxation	-2,300	-130
Total	-1,570	828

During the year under review, tax accruals of EUR - 17k (2019: EUR 53k) on items booked directly under equity were also recognized as equity and not included in the income statement.

The reasons for the difference between the anticipated tax burden and the reported income tax expense are as follows:

EUR k	2020	2019
Pre-tax result	-4,831	3,381
Anticipated tax burden	-1,208	846
Tax expense pursuant to the income statement	-1,570	828
Difference to be explained	-362	-18
Reasons for the difference:		
Reduction in the tax burden owing to:		
A change in the tax accruals on loss carryforwards	44	0
The effect of differing tax rates	6	15
Group taxation	0	0
Tax income relating to earlier periods	-47	-2
Various allowances and other permanent differences	-445	-43
Increase in the tax burden owing to:		
Withholding tax	-5	-35
Shareholder subvention	0	0
Non-deductible expenses	-3	11
Back tax payments relating to earlier periods	60	44
Other	28	-8
Declared difference	-362	-18

### **3.5.** Inventories

Raw, auxiliary and operating materials, as well as finished goods are reported under "Inventories", which are structured as follows:

EUR k	31 Dec. 2020	31 Dec. 2019
Raw, auxiliary and operating materials	6,053	6,813
Unfinished goods	468	392
Finished products and goods	281	288
Prepayments made	61	31
Total	6,863	7,524

Depreciation on inventories takes the form of a deduction on their replacement value and is dependent on how long they have been stored and the extent to which they can usefully be used in production. Depreciation on inventories amounted to EUR 522k (2019: EUR 296k), of which EUR 178k can be attributed to the changes in strategy for Bublon GmbH and Binder+Co Machinery (Tianjin) Ltd.

The expense for **materials used** reported in the income statement is as follows:

EUR k	2020	2019
Materials used	44,569	45,668
Services purchased	9,261	12,804
Total	53,830	58,472

### **3.6. Receivables and other Assets**

EUR k	31 Dec. 2020	31 Dec. 2019
Trade receivables	22,184	20,784
Receivables from affiliated companies	0	0
Other receivables and assets	3,250	4,156
Other accruals	296	493
Total	25,730	25,433

The trade receivables sum includes receivables from contracts with customers totalling EUR 12,662k (2018: EUR 11,554k).

The maturities of the receivables reported in the consolidated balance sheet are as follows:

### As at 31 Dec. 2020

EUR k	Current	Non-current	Total
Trade receivables	22.184	Ω	22,184
Receivables from affiliated companies	0	0	0
Other receivables and assets	3,192	58	3,250
Other financial assets	0	0	0
Other accruals	296	0	296
Total	25,672	58	25,730

### As at 31 Dec. 2019

EUR k	Current	Non-current	Total
Trade receivables	20.784	Ο	20,784
	20,704	U	20,704
Receivables from affiliated companies	0	0	0
Other receivables and assets	4,162	43	4,205
Other financial assets	0	0	0
Other accruals	494	0	494
Total	25,440	43	25,483

Every change in the credit rating of the customer from the granting of payment terms to the balance sheet date is accounted for during the valuation of trade receivables. The determination of value impairments took the collateralization of payments by banks, as well as concluded export insurance agreements into account.

The accruals on trade receivables showed the following movements:

EUR k	2020	2019
Accruals at the beginning of the year	2,060	1,450
Additions to the scope of consolidation	0	0
Transfers	0	0
Currency translation differences	-10	-6
Additions	1,386	941
Availments	-1,551	-203
Reversals	-157	-122
Accruals at the end of the year	1,728	2,060

The receivables from contracts with customers (trade receivables) contain the following sums:

EUR k	2020	2019
Order costs up to the balance sheet date	17,020	14,754
Plus recognized gains/less recognized losses	4,092	3,264
Less liabilities from contracts with customers	-8,450	-6,464
Total	12,662	11,554

The deducted liabilities from contracts with customers relate to pre- and part-payments received.

According to IFRS 15, revenue from contracts with customers is recognized over a period prior to delivery to the customer's premises. As a consequence, revenue for these products is recognized earlier under IFRS 15 than under IAS 18. As revenue was being recognized in a specific period prior to the initial application of IFRS 15 by the Binder+Co Group and was thus also recognized under trade receivables, this change does not have any ramifications for other items in the consolidated financial statements.

The trade receivables structured according to due date are as follows:

EUR k	31 Dec. 2020	31 Dec. 2019
Not due	17,848	15,492
1 – 90 days overdue	1,686	2,074
91 – 180 days overdue	724	496
More than 180 days overdue	1,926	2,722
Total	22,184	20,784

Trade receivables are not interest-bearing and are generally due within 30 days.

### Other receivables comprise:

EUR k	31 Dec. 2020	31 Dec. 2019
Fiscal authority balances	1,322	1,671
Severance payment liability insurance	36	34
Receivables from INPS-fund	449	399
Receivables from creditors	76	84
Receivables from payroll actions	160	95
Grant receivables	0	0
Receivables from insurers	197	381
Receivables from suppliers	97	224
Bonuses for apprentices. research. training	512	649
Security deposits	57	72
Other	344	547
Total	3,250	4,156

### **3.7. Cash and Cash Equivalents**

EUR k	31 Dec. 2020	31 Dec. 2019
Cash	6	6
Bank balances	3,103	2,186
Total	3,109	2,192

### 3.8. Accruals

EUR k	31 Dec. 2020	31 Dec. 2019
Accruals	296	493

### 3.9. Equity

As there was no change in the issued capital of Binder+Co AG as compared to the preceding year, nominal capital is reported as EUR 3,750k. This consists of 3.750.000 registered shares with a value of EUR 1.00 each.

In 2017 85,548 treasury shares were sold at the price of EUR 12.00 each, and the share premium in the amount of EUR 143k was shown as a capital reserve.

The shares confer upon the holders the standard rights allocated under the Austrian Stock Corporation Act. These include the right to the payment of dividends pursuant to a resolution of the Annual General Meeting on the basis of the individual financial statement of the parent company prepared in accordance with the Austrian Commercial Code (UGB), together with the right to vote at the Annual General Meeting.

The item "Reserves" contains capital reserves and retained earnings including net profit, as well as the adjustment items from currency translations (cf. Consolidated Equity Statement).

For 2020, the Management Board suggests that the net profit be carried forward to new account.

#### **3.10. Non-controlling Interests**

The item "Non-controlling interests" contains the share of subsidiary equity held by non-Group shareholders. As per 31 December 2020 the third-party share of the Group's equity was 26.7%. In 2020, no distributions were made to non-Group shareholders of subsidiaries (2019: EUR 246k).

Non-controlling interests exist with regard to the following subsidiary:

	31 Dec. 2020	31 Dec. 2019
Statec Binder GmbH	49.3%	49.3%

### 3.11. Obligations in Respect of Employees (Social Capital)

EUR k	31 Dec. 2020	31 Dec. 2019
Provision for severance payments	6,454	7,003
Provision for pensions	387	416
Provision for long-service bonuses	1,545	1,671
Total	8,386	9,090

### 3.12. Provisions for Severance Payments

EUR k	31 Dec. 2020	31 Dec. 2019
Present value of severance payment obligations (DBO) as at 1 Jan.	7,003	7,090
Service cost	225	228
Interest cost	73	104
Severance payments	-708	-796
Liabilities from severance payments	0	0

Total	11,695	6,124	17,819	12,317	6,913	19,230

The registration of a mortgage to the amount of EUR 12,000k was agreed in favor of the financing banks and has been set down with a mortgage order agreement dated December 20, 2019. This was carried out in the land registry on January 13, 2020 by order of the Weiz district court. In order to secure liquidity, a special KRR refinancing facility worth EUR 6,000k was taken out as part of COVID-19 help measures. The "COVID-19 assistance" is a program for supporting the export economy which was developed by the Federal Ministry of Finance and the Österreichische Kontrollbank (OeKB).

The current value of the financial liabilities corresponds with the carrying values. Current values are determined by the discounting of future payments subject to the assumption of the current market interest rate.

### 3.17. Trade Payables

EUR k	31 Dec. 2020	31 Dec. 2019
Creditors	7,964	6,959
Obligations from manufacturing contracts	3,990	1,553
Total	11,954	8,512

The item "Liabilities from contracts with customers" includes prepayments received. EUR 0k (2019: EUR 2k) of the trade payables can be classified as non-current.

### 3.18. Liabilities to companies in which an interest is held

In December 2019, a subordinate shareholder loan of EUR 6,000k with a term originally until 31 December 2020 and an interest rate of 6% p.a. was agreed with the main shareholders and paid in. For reasons of liquidity, repayment was deferred by mutual consent; and as the loan will not be redeemed before 31 December 2021 at the earliest, the loan was classified as long-term. Under the item liabilities to companies in which participations are held, the loan amounts received and the interest payable thereon by shareholders holding more than 20% of the shares in Binder+Co are reported. The remaining amount is shown under the item other liabilities, which are described under point 3.19.

EUR k	Non-Current	Current	<b>31 Dec. 2020</b> Total	Non-Current	Current	31 Dec. 2019 Total

Leasing obligations carried as liabilities	1,293	1,387
Shareholder Ioan	2,248	2,312
Other	364	72
Total	8,077	9,386

### 3.20. Sales Revenue/Revenue from Contracts with Customers

The Binder+Co Group's revenues come primarily from the manufacture of plant and machinery for processing, recycling and packing bulk goods and from the provision of services to its customers. These were generated over the same period of time as in the previous year, and are regionally split as follows:

EUR k	2020	2019
Austria	7,645	8,746
EU area	50,871	36,290
Rest of Europe incl. Russia	9,151	22,611
Africa	3,505	13,699
Asia/Australia	22,178	25,023
America	5,670	7,038
Gesamt	99,020	113,407

All other types of revenue are covered in item 3.21. in "Other operating income".

### 3.21. Other Operating Income

EUR k	2020	2019
Income from the disposal and reversal of non-current assets	0	19
Income from the release of provisions	95	308
Other	3,409	2,421
Total	3,504	2,748

### Other income includes:

EUR k	2020	2019
Exchange rate gains	0	0
Income from the reversal of provisions	429	187
Expenses invoiced to third parties	118	569
Income from licences	86	87
Training, apprenticeship and research premiums	356	176
Insurance payments	2,152	1,115
Non-repayable grants	153	137
Income from rents	48	0
Other	67	150
Total	3,409	2,421

### 3.22. Other Operating Expenses

Other receivables comprise:

EUR k	2020	2019
Rental and leasing expenses	458	514
Travel expenses and allowances	1,566	3,366
Commission	3,063	4,131
Legal and consultancy fees	2,768	1,713
Maintenance and repairs	919	1,032
Freight costs and transport	1,690	2,110
Insurance	562	604
External services	1,924	2,066
Vehicle fleet	0	24

Office expenses	362	136
Write-offs of receivables	332	731
Loss events	177	0
Expenses from associated companies	0	0
Other	712	747
Total	17,523	20,320

### The **auditing expenses** incurred during the financial year amount to:

EUR k	2020	2019
Fees for the auditing of the annual financial statements (compa ny/group)	63	65
Fees for tax consultancy	0	0
Fees for other consultancy	6	7
Total	69	72

The auditing expenses for the annual financial statements incurred during the financial year include the separate and consolidated financial statements of Binder+Co AG and the separate financial statements of Statec Binder GmbH and Bublon GmbH.

### 3.23. Personnel Costs

EUR k	2020	2019
Wages and salaries	19,961	22,489
Statutory social security contributions	5,281	5,896
Severance payments	619	750
Pensions	4	11
Other employee benefits	1,667	410
Total	27,532	29,556

In order to mitigate against the economic effects of the COVID-19 pandemic, the "COVID-19 short-time working" facility was used for the period April to September 2020. The government subsidy to compensate for cancelled work amounts to EUR 1,888k and has been entered under personnel expenses.

As it continues to be impossible to assess the development of the COVID-19 pandemic and its impact, a realignment of the company strategy was necessary and the decision was taken to concentrate on core business processes and on a slimmed-down organization, so as to be able to react positively also in times of reduced demand. This made it necessary to release personnel. A provision of EUR 1,702k was created for the associated costs (a social plan and compulsory retention costs linked to individual notice terms). The social plan, with costs of EUR 1,520k is reported under Other employee benefits.

### Average employee numbers were as follows:

	2020	2019
Non-salaried staff	115	107
Salaried staff	267	257
Apprentices	9	8
Total	391	372

### **3.24. Financial Expenses**

EUR k	2020	2019
Interest and similar expenses	890	826
Write-down of financial assets	0	8
Other expenses relating to financial assets	0	0
Total	890	834

### **3.25.** Income from Financial Investments

EUR k	2020	2019
Interest and similar income	2	33
Income from other securities and financial asset securities and bonds	3	3
Total	5	36

## 4. Notes to the Consolidated Cash Flow Statement

The cash flow statement has been prepared using the indirect method. Cash and cash equivalents consist entirely of cash in hand and bank balances.

For further explanation, reference is made to the cash flow statement.

## 5. Financial Instruments

A financial instrument is a contract, which simultaneously leads one partner to a financial asset and the other to a financial liability or an equity instrument. In particular, financial instruments consist of cash and cash equivalents, trade receivables, other receivables and derivatives. Financial liabilities establish a repayment obligation in cash or in the form of another financial asset. In particular these include financial liabilities such as liabilities to banks, from financial leasing and trade payables.

On the balance sheet date, the financial instruments were structured as follows (valuation pursuant to IFRS 9):

Assets           Participations in affiliated companies         FVPL         0         0         0         0 <sup>11</sup> Securities (rights) held as fixed assets         FVPL         216         0         216         216           Other loans         L&R         0         0         0         0         0         0           Trade receivables         L&R         22,184         22,184         0         0         22,184           Receivables from affilated companies         L&R         0         0         0         0         0           Other receivables and assets         L&R         1,416         1,416         0         1,416           Derivative financial instruments         FVPL         0         0         0         0           Cash and cash equivalents         L&R         3,109         3,109         0         3,109           Liabilities         Liabilities to banks         FLaC         17,819         17,819         0         0         7,964           Liabilities to affiliated companies         FLaC         3,752         3,752         0         0         3,990           Liabilities to affiliated companies         FLaC         3,752         3,752         0	EUR k	Valuation category as per IFRS 9	Carrying value as at 31 Dec. 2020	Amortized cost	Fair value not recog- nized as profit or loss	Fair value recognized as profit or loss	Fair Value as at 31 Dec. 2020

		_	-	-	-	

<sup>1)</sup> Owing to the lack of a reliable market value, participations in affiliated companies are reported at amortized cost less depreciation.

<sup>2</sup> Owing to the lack of a current price, fair value was determined with the present value of the related payments taking into account the given market parameters on the balance sheet date.

The majority of the cash and cash equivalents, trade receivables and other financial receivables have short maturities. Therefore, the carrying values on the balance sheet date approximate to fair value. Where no current values are available, the fair value of non-current financial assets corresponds with the present values of the related payments, taking into account the respective current market parameters.

Trade payables and other financial liabilities regularly have short maturities. The reported values correspond roughly with fair value. Where no current values are available, the fair value of liabilities to banks and from financial leasing corresponds with the present values of the related payments, taking into account the respective current market parameters.

The Binder+Co Group employs the following hierarchy for the determination and reporting of the fair value of financial instruments:

- Level 1: Listed (unadjusted) prices on active markets for identical assets or liabilities.
- Level 2: Processes in which all the input parameters with a major influence on fair value are either directly or indirectly observable.
- Level 3: Processes that use input parameters which exert a significant influence on fair value and are not based on observable market data.

### 6. Other Information

### **6.1. Other Obligations and Contingent Liabilities**

### **6.1.1. Rental and Leasing Agreements**

Since 1 January 2019, the Group has recognized rights of use for these leases, with the exception of short-term leases of a low value (see item 2.2.3. and 3.2.).

### **6.1.2.** Pending Litigation

Arbitration proceedings in conjunction with a systems project in England took place in December 2020; adjudication is expected in April 2021. A claim is being made for services performed and as yet unpaid by the customer. EUR 2,319k consultation and arbitration costs have been incurred for these proceedings in the reporting year.

Due to the unforeseeable magnitude of the costs of the proceedings, higher cost absorption of the legal defense costs was agreed with our insurers, with the result that an additional EUR 1,692k of insurance indemnification was paid out in 2020. Conversely, deferred costs of EUR 1,883k had to be released from a different insurance component. Furthermore, a value adjustment had to be made for receivables totaling EUR 336k. There are no other legal disputes pending that could have a material effect on the financial statements.

### 6.1.3. Off-Balance Sheet Transactions

As at 31 December 2020, bank guarantees from prepayments of EUR 4,830k and performance bonds to the value of EUR 7,481k existed as liabilities to customers.

The risk to the Group emanating from these guarantees can be classified as extremely small and therefore they need not be reported as a provision.

### **6.1.4.** Contingent Liabilities

On the balance sheet date the contingent liabilities that were omitted from balance sheet reporting owing to a lack of concrete detail consisted of the following:

EUR k	31 Dec. 2020	31 Dec. 2019
Guarantees	0	0
Other contractual contingent liabilities	0	0
Total	0	0

An order commitment for investments in the coming year exists amounting to EUR 386k (2019: EUR 472k).

### 6.2. Business Relationships to Related Companies and Personages

The Binder+Co Group corporate bodies are:

### Management Board of Binder+Co AG, Gleisdorf

- Jörg Rosegger (1.1.2016 to 31.12.2021 / since 2007)
- Martin Pfeffer (1.1.2020 to 31.12.2023 / since 2018)

### Supervisory Board of Binder+Co AG, Gleisdorf

- Kerstin Gelbmann, Chairman (1.5.2017 to AGM 2021) prior to this Supervisory Board member since 12.4.2016
- Alexander Liaunig, Deputy Chairman (18.4.2018 to AGM 2021)
- Kurt Berger (10.4.2013 to AGM 2021)
- Hubertus Nikolaus Schaschl (9.4.2014 to AGM 2021)
- Veit Sorger (10.4.2013 to AGM 2021)

Staff Council delegates: Doris Leiner Harald Simon

The salaries of the Management Board contain both fixed and success-related payments, whereby the amount of the variable remuneration is dependent upon net Group income. In the financial year the salaries of the members of the Management Board totalled EURk 622 (2019: EUR 594k), of which EUR 43K (2019: EUR 46k) was as variable remuneration. The total remuneration amount includes both longservice bonus and severance payments.

In the reporting year remuneration payments to the Binder+Co AG Supervisory Board totalled EUR 35k (2018: EUR 41k). In 2019, a pensions provision of EUR 487k (2019: EUR 416k) was recognized for former Management Board members and their dependants. The ongoing annual payments in 2019 amounted to EUR 107k (2019: EUR 147k).

Binder+Co AG has concluded a D&O insurance agreement, which hedges certain personal liability risks of the persons with active responsibility for the Binder+Co Group. The annual costs, which are borne by the company, amount to EUR 11k (2019: EUR 11k).

Furthermore, there were business relationships with the following companies:

EUR k	2020	2019
Liabilities	5,275	5,209
Thereof Liaunig Industrieholding AG	2,112	2,085
Thereof Albona Private Trust	1,640	1,619
Thereof Treibacher Industrieholding GmbH	1,147	1,134
Thereof Austro Holding GmbH	376	371
Expenses	330	28
Thereof Liaunig Industrieholding AG	136	18
Thereof Albona Private Trust	99	4
Thereof Treibacher Industrieholding GmbH	69	4
Thereof Austro Holding GmbH	23	1
Thereof Herbert Liaunig Private Trust	3	1

The above-mentioned amounts originate primarily from the shareholder loan as described under point 3.8.

### 6.3. Earnings per Share

The earnings per share are calculated by dividing the after-tax profit for the year attributable to the shareholders of the parent company by the weighted ordinary share average.

The diluted earnings per share are calculated by dividing the after-tax profit for the year attributable to the shareholders of the parent company by the weighted ordinary share average, taking into account the share options.

The calculation is as follows:

EUR	2020	2019
Profit for the year attributable to the parent company	-3,943,000	1,553,000
Weighted ordinary share average	3,749,378	3,749,343
Undiluted earnings per share	-1.05	0.41
Profit for the year attributable to the parent company	-3,943,000	1,553,000
Weighted ordinary share average	3,749,378	3,749,343
Diluted earnings per share	-1.05	0.41

The average number of shares was calculated as follows:

EUR	2020	2019
As per O1 Jan	3,750,000	3,750,000
Treasury shares	0	0
Average treasury shares	0	0
Average shares declared null and void	-622	-657
Average shares	3,749,378	3,749,343

### 7. Events after the Balance Sheet Date

No other procedures or events occured, which could have had a material influence on the asset, financial and earnings position reported in the consolidated financial statements between the closing date for the financial statements as at 31 December 2020 and their release by the Binder+Co AG Management Board on 22 February 2021.

Gleisdorf, 22 February 2021

Martin Pfeffer Member of the Management Board

Jörg Rosegger Member of the Management Board

## Auditors' Report

## Report on the Consolidated Financial Statements, Audit Opinion

We have audited the consolidated financial statements of Binder+Co AG, Gleisdorf, and its subsidiaries (the Group), consisting of the consolidated financial statements per 31 December 2020 with equity capital of EUR 23,857,000.00, the consolidated income statement, the consolidated statement of comprehensive income, the consolidated cash flow statement and the changes in consolidated equity for the financial year ending on this reference date, and the notes to the consolidate d financial statements.

In our opinion, the attached consolidated financial statements comply with the statutory requirements and provide a true and fair view of the assets and finances of the Group as at 31 December 2020, and of the income and cash flows of the Group for the financial year ending on this reference date, in accordance with the International Financial Reporting Standards as applicable in the EU (IFRS), and the additional requirements of section 245a of the Austrian Commercial Code (UGB).

## Basis for the Audit Opinion

We carried out our audit in accordance with Austrian standards for the auditing of financial statements, which require the application of the International Standards on Auditing (ISA). Our responsibilities under these standards are described in greater detail in the section of our audit opinion entitled "Responsibilities of the auditor in regard to the auditing of consolidated financial statements". We are independent of the Group, in compliance with the requirements of Austrian corporate law and professional regulations, and we have fulfilled our other professional duties in compliance with these requirements. We believe that the audit evidence we have obtained is sufficient to date and appropriate to serve as a basis for our audit opinion.

## Other Information

The Management is responsible for the other information, which includes all information in the management report, except for the consolidated financial statements, the consolidated management report and the audit report. The business report is expected to be made available to us after the date of the audit report. Our audit opinion concerning the annual financial statements does not cover this other information, and we will not provide any kind of assurance in this regard.

In connection with our audit of the annual financial statements it is our responsibility to read this other information as soon as it becomes available, and to consider the question of whether, in light of our understanding based on the audit, it materially contradicts the annual financial statements, or appears materially misrepresented in any other way.

## Responsibilities of Management and of the Supervisory Board Audit Committee for the Consolidated Financial Statements

The management is responsible for drafting the consolidated financial statements and for ensuring that the consolidated financial statements provide a true and fair picture of the assets, financial position and results of operations of the Group, in accordance with the IFRS as applicable in the EU and the additional requirements of section 245a UGB. In addition the management is responsible for the internal controls which they regard as necessary to ensure that the consolidated financial statements are free from material misstatement, whether due to fraud or error.

When drawing up the consolidated financial statements, the management is responsible for assessing the Group's ability to continue as a going concern, and – insofar as may be relevant – for stating the circumstances relating to its continuation as a going concern, and also for applying the going concern accounting principle, unless the management intends either to liquidate the Group or to suspend activities, or do not have any realistic alternative to doing so.

The Supervisory Board/Audit Committee is responsible for the supervision of the accounting processes of the Group.

## Auditors' Responsibilities for the Audit of the Consolidated Financial Statements

Our aims are to attain sufficient certainty as to whether the consolidated financial statements as a wholeare free from material misstatements, whether due to fraud or error, and to issue an audit certificate which contains our audit opinion. Sufficient certainty is a high level of certainty, but is not a guarantee that an audit carried out in accordance with Austrian standards for the auditing of financial statements, which require the application of the ISA, will always reveal any material misstatement that may be contained therein. Misstatements can result from fraudulent acts or errors, and are regarded as material if they could reasonably give rise to the expectation, either individually or taken together, that they will influence the economic decisions of users that have been made on the basis of these consolidated financial statements.

As part of an audit conducted in accordance with Austrian standards for the auditing of financial statements, which require the application of the International Standards on Auditing (ISA) we exercise our professional judgement throughout the whole audit process and take an intrinsically questioning approach to all that is presented to us.

### The Following Applies in Addition:

We identify and assess the risks of material misstatements in the financial statements (whether due to fraud or error), design our audit procedures in response to these risks, carry out these procedures and obtain audit evidence which is sufficient and appropriate to serve as a basis for our audit opinion. The risk of material misstatements due to fraud not being revealed is greater than the risk where error is involved, since fraudulent acts can include collusion, forgery, intentional omissions, misrepresentations or the override of internal control.

- We obtain an understanding of internal control relevant to the audit in order to design audit procedures that are appropriate in the circumstances, but not for the purpose of expressing an opinion on the effectiveness of the internal control.
- We evaluate the appropriateness of the accounting policies used and the reasonableness of accounting estimates and related disclosures made by management.
- We conclude on the appropriateness of the management's use of the going concern basis of accounting and, based on the audit evidence obtained, whether a material uncertainty exists related to events or conditions that may cast significant doubt on the Group's ability to continue as a going concern. If we conclude that a material uncertainty exists, we are required to draw attention in our auditor's report to the related disclosures in the consolidated financial statements or, if such disclosures are inadequate, to modify our opinion. Our conclusions are based on the audit evidence obtained up to the date of our auditor's report. However, future events or conditions may cause the Group to cease to continue as a going concern.

- We evaluate the overall presentation, structure and content of the consolidated financial statements, including the disclosures, and whether the consolidated financial statements represent the underlying transactions and events in a manner that achieves fair presentation.
- We obtain sufficient appropriate audit evidence concerning the financial information of the entities or business activities within the Group in order to provide an audit opinion on the consolidated financial statements. We are responsible for the direction, supervision and execution of the audit of the consolidated financial statements. We bear sole responsibility for our audit opinion.
- We communicate with the Supervisory Board/Audit Committee regarding, among other matters, the
  planned scope and timing of the audit and important audit findings, including any significant deficiencies
  in the internal control system that we identify during our audit.

## Comments on the Management Report for the Group

The consolidated management report is to be audited on the basis of the requirements of Austrian corporate law to determine whether it is in accordance with the consolidated financial statements and whether it has been drawn up in accordance with the applicable legal requirements.

The legal representatives are responsible for drawing up the consolidated management report in accordance with the requirements of Austrian corporate law.

We have carried out our audit in accordance with professional principles in regard to the auditing of consolidated management reports.

### Opinion

In our opinion, the consolidated management report has been drawn up in accordance with the applicable legal requirements and is in accordance with the consolidated financial statements.

### Declaration

In light of the findings attained in the course of the audit of the consolidated financial statements and the understanding we obtained with regard to the Group and its environment, we found no material incorrect information in the consolidated management report.

SOT Süd-Ost Treuhand Gesellschaft m.b.H. Wirtschaftsprüfungs- und Steuerberatungsgesellschaft

This report is a translation of the original report in German, which is solely valid. The publication or dissemination of the consolidated financial statements bearing our opinion may only take place in the version approved by us. This opinion relates exclusively to the complete consolidated financial statements with consolidated management report in German. With regard to deviating versions, the requirements of § 281 (2) UGB are to be observed.

# Supervisory Board Report

### Dear Shareholders,

In the 2020 financial year the Supervisory Board continuously monitored and assisted the work of the Management Board. The basis was provided by the detailed reports given by the Management Board in both written and verbal form. In addition, there were regular discussions held between the Chair of the Supervisory Board, her Deputy and the members of the Supervisory Board with the Management Board.

In the 2020 financial year, the Supervisory Board held four regular meetings, in which the Supervisory Board was informed about the situation of the company by reports of the Executive Board.

If agreement was required for decisions or actions by the management, the members of the Supervisory Board reviewed the proposed resolutions that had been provided to them beforehand, and took their decisions either at their meetings or by circular resolution. The Supervisory Board was involved in all decisions of essential importance for the company. The economic situation outlined in the Management Board's reports and the development prospects for the company were the subject of detailed discussions.

### **Consolidated Financial Statements, Final Audit**

The company has prepared an individual financial statement in accordance with the Austrian Commercial Code (UGB) and consolidated financial statements in accordance with IFRS. Both financial statements have been audited by the appointed auditor, Süd-Ost Treuhand Gesellschaft m.b.H., Wirtschaftsprüfungs- und Steuerberatungsgesellschaft, Graz, and issued with an unqualified audit opinion. The auditing principles are set out in the auditor's report. Neither of the audits gave cause for objections.

The individual and consolidated financial statements, the management report and consolidated management report, and the audit report were presented to all the members of the Supervisory Board. The financial statement documents were reviewed by the Supervisory Board and discussed in detail in the presence of the auditors after they had presented their report.

The Supervisory Board adopted the individual and consolidated financial statements prepared by the Management Board. The individual and consolidated financial statements have thus been approved pursuant to section 96 para. 4 of the Austrian Stock Corporation Act (Aktiengesetz). The Supervisory Board agrees with the management report, the consolidated management report and in particular the assessment of the further development of the company.

The Supervisory Board concurs with the Management Board's proposal that the net profit shown in the annual financial statement for the 2020 financial year in the amount of EUR 161,299.72 be entirely carried forward to new account.

Pursuant to section 270 para. 1 UGB the Supervisory Board proposes that Süd-Ost Treuhand Gesellschaft m.b.H., Wirtschaftsprüfungs- und Steuerberatungsgesellschaft, Wien, be appointed as auditor for the 2021 financial year (individual and consolidated financial statements).

The Supervisory Board thanks the management of the company and all the employees for their commitment and hard work in the 2020 financial year.

Vienna, 9 March 2021

For the Supervisory Board

Kerstin Gelbmann Chair of the Supervisory Board

# Binder+Co's Company History

### 1894

The master metalworker Ludwig Binder founds a small building and artistic metalworking shop in Graz-Eggenberg. The focus of company activities in the following decades is on steel constructions.

### 1926

Alois Sernetz, the son-in-law of the founder, assumes the management of the company and guides it through the turmoil of the global economic depression.

### ab 1940

Following the recession years, an economic upturn commences at the beginning of the 1940s and a mediumsized industrial company emerges with a workforce of over 150.

### 1954

The revolutionary "Binder System" for vibratory screening machines is developed. It is used initially for the foods industry.

### 1960

The company moves from Graz to newly built premises in Gleisdorf, where the first processing systems are produced for the construction industry.

### 1971

In order to secure the global marketing of Binder+Co machines, the company is integrated into the voestalpine Group. The first large systems for the stone and earth and mining industries are designed and manufactured.

### 1978

Binder+Co develops its first packaging systems for free-flowing bulk goods.

### 1989

The first recycling machines are produced. They are employed for the sorting of cullet.

### 1991

Binder+Co is re-privatized and subsequently comes under the majority ownership of Auricon Beteiligungs AG, an investment group headed by the industrialist Herbert W. Liaunig.

### 1998

Linkage to the Waagner-Biro Group, also owned by Auricon.

### 2006

From December 2006, Binder+Co AG is listed on the unregulated Third Market of the Vienna Stock Exchange.

### 2007

In June 2007, Binder+Co AG is accepted into the newly created mid market segment of the Vienna Stock Exchange and in July is relisted in regulated OTC trading.

### 2008

Total withdrawal of the Waagner-Biro Group in early March.

As a result of the integration of Packaging Technology Segment activities into a joint venture, in October Binder+Co AG becomes the majority shareholder of Statec Binder GmbH with 50.7% of company stock.

### 2009

On 21 September, the Binder+Co AG share is accepted into mid market continuous trading.

### 2010

In January, the Binder+Co share switches to the Third Market within the mid market. Binder+Co is awarded the Austrian National Innovation Prize for its development of the world's first industrially mature system for the sorting of heat-resistant glass from cullet.

### 2011

MINEXX, a module for mineral sorting is launched onto the market.

Binder+Co is awarded the Austrian National Work Safety Prize and is also presented with the Best Open Innovator Award in Berlin as the top SME in the D-A-CH region.

July sees the takeover of an Italian mechanical engineering company, which specializes in comminution technology. It is integrated into the Group as Comec-Binder S.r.I.

### 2012

In January, the fully owned Bublon GmbH subsidiary is founded. This provides Binder+Co with a solid basis for the global marketing of a new and entirely natural basic composite for construction materials with excellent insulation and soundproofing characteristics introduced in autumn 2011.

In April, Binder+Co signs a contract for the construction and rental of its own production and office complex in Wuqing, near the Chinese port of Tianjin.

### 2013

January sees the foundation of Binder+Co Machinery (Tianjin) Ltd. in China, and in May the new sales, production and services location goes into operation. Up to the end of December 2013, the company assembles 23 screening machines for the Chinese coal mining industry. The core components for this Binder+Co machinery continue to be supplied from Austria, while assembly takes place in China using locally manufactured components.

### 2014

Clients put the first customized BUBLON plants into operation.

### 2015

The first CLARITY modules for the sorting of plastic flakes and granulates are launched onto the market.

### 2016

At the end of July, Binder+Co delists its shares from the Vienna Stock Exchange. The US subsidiary Binder+Co USA, Inc., which has its company seat in Denver, Colorado, becomes operative in August.

### 2018

In March Binder+Co received the US-A-BIZ AWARD in the "trendsetter" category from the Los Angeles Foreign Trade Center; and in June, the Styrian Award for Exports in the category "large enterprises" from the Styrian Economic Chambers (WKÖ).

### 2019

Binder+Co celebrates it's 125th company anniversary.

### 2020

In June Binder+Co stages the online live stream launch of its BIVITEC e+, the latest development in the BIVITEC series.

## Glossary

## **Company Specific**

BIVITEC	Damp, fine and glutinous materials or matted substances are regarded as being difficult to screen materials. They block the perforations in the screens of conventional machines and thus render efficient screening impossible. With its BIVITEC system, Binder+Co offers a basic solution for these demanding tasks the screen linings are subject to constant vibration, which prevents perforation clogging.
BUBLON	<b>BUBLON</b> is a process developed by Binder+Co for the expansion of perlite and obsidian. The products produced using <b>BUBLON</b> serve as a basis for manufacturing in the construction and insulation material industries. Extremely high energy efficiency levels (50% less energy consumption than in conventional methods) and excellent raw material use characterize this process. With the BUBLITE technology we develop ultrafine microspheres for numerous applications in the lightweight materials industry.
Bulk materials	Free-flowing batches of sand, gravel and cement, raw materials (e.g. ores, coal) and foodstuffs (cereals, sugar, salt, coffee, granules etc.) are also known as <b>bulk materials</b> .
<b>CLARITY,</b> Three-way system	With <b>CLARITY</b> Binder+Co has developed the first <b>three-way system</b> or the sorting of cullet. Using a sensor system, differing characteristics (color, electrical conductivity, etc.) are logged and determined, and the glass to be sorted and classified accordingly. As opposed to standard sorting systems, which after the sorting process emit the glass in two material flows, e.g. mixed glass (white, green, brown) and contaminants (ceramic content), the Binder+Co machine is able to sort the material according to three characteristics in a single process, e.g. white glass, colored glass (green, brown) and contaminants (ceramic content).
Complete systems	From the outset, Binder+Co's strategy was not only directed towards the manufacture of single machines, but also their combination to form complete systems for precisely coordinated processes. In the case of these customized solutions, the priority is to achieve both technical and economic optimization.

Difficult to screen materials	Damp, fine and glutinous materials or matted substances are regarded as being difficult to screen materials. They block the perforations in the screens of conventional machines and thus render efficient screening impossible. With its BIVITEC system, Binder+Co offers a basic solution for these demanding tasks, as the screen linings are subject to constant vibration, which prevents perfora- tion clogging.
High-performance packaging	In the case of bags with content of 10kg and above, <b>high-performance packaging</b> is defined as the filling of at least 1,200 bags per hour. This means that at a maximum, a bag must be automatically filled and sealed within three seconds. In order to achieve this target, several plant processes have to be completed in parallel operation. With its <b>PRINCIPAC</b> series, the Binder+Co Group offers fully automatic packaging machines, which can handle up to 1,600 bags hourly.
Industrial minerals	<b>Industrial minerals</b> (e.g. processed calcium carbonate) play an indispensable role in industrial processes, as they constitute a vital constituent of dyes, electronic products, cast metals, paper, plastics, ceramics, cleaning agents, pharmaceu- ticals, cosmetics, construction materials, agricultural goods, etc., and are also employed as additives in the foods and feedstuffs industries.
Innovation ratio	Binder+Co assess the success of its R&D by means of an <b>innovation ratio</b> , which in 2018 averaged 18.3%. This means that around 18% of total order intake was attained with products that Binder+Co has launched onto the market as new, in-company developments during the past three years.
MINEXX	<ul> <li>MINEXX is a system for the optical sorting of minerals. Hence, the diversity of minerals and their selective recognition are accounted for using a combination of the sensor modules already employed in the CLARITY systems. MINEXX UV-VIS-NIR is a new type of minerals sorting system, which can operate in the ultraviolet, visible and near infrared light wave ranges.</li> <li>Open mouth bagging is understood to mean the filling of pre-produced paper, plastic and synthetic woven bags with free-flowing bulk goods such as fertilizers, plastic granulate, seeds, foods and feedstuffs or salts. When filled, the bags weigh between 10 and 50kg. The main technical challenges in this regard are the combining of the high packing performance with excellent plant availability levels and low susceptibility to error.</li> </ul>

Open mouth bagging	<b>Open mouth bagging</b> is understood to mean the filling of pre-produced paper, plastic and synthetic woven bags with free-flowing bulk goods such as fertilizers, plastic granulate, seeds, foods and feedstuffs or salts. When filled, the bags weigh bet- ween 10 and 50kg. The main technical challenges in this regard are the combining of the high packing performance with excellent plant availability levels and low su- sceptibility to error.
Primary raw materials	As opposed to <b>secondary raw materials, primary raw materials</b> are working and process materials, not obtained from waste, but from natural resources.
Secondary raw materials	As opposed to <b>primary raw materials, secondary raw materials</b> are obtained from the recycling of waste (e.g. cullet, used paper, plastic waste). They frequently serve as the source material for new products. The employment of secondary raw materials taps into and protects valuable resources and thus contributes to sustainable development.
Single machines	In addition to complete systems, Binder+Co also develops and manufactures sing- le machines for the comminuting, screening, wet processing, thermal processing, sorting, bagging and palletizing of all types of bulk goods. The most important company products are: <b>BIVITEC</b> screening machines, <b>SANDEXX</b> machines for economic wet treatment, <b>DRYON</b> machines for efficient drying and cooling, the revolutionary <b>CLARITY</b> glass sorting machine, the <b>MINEXX</b> mineral sorting system, the <b>PRINCIPAC</b> open mouth bagging system and the <b>PRINCIPAL</b> palletizing system.
Stone and earth industry	In the <b>stone and earth industry</b> , <b>industrial minerals</b> are utilized to obtain basic materials for differing industrial branches, such as the production of construction materials, as well as materials for the ceramic, chemical and pharmaceutical industries.

## **Business and Financial**

Actual taxes	<b>Actual taxes</b> represent the amount of income tax due/claimed during an accounting period. As a rule, it relates to the tax expense for the respective financial year.
Available for Sale	<b>Available for Sale</b> securities are classified as investments that are not intended to serve company operations in the long-term.
Cash flow	<b>Cash flow</b> serves to define a company's financial health and also indicates its finan- cial flexibility and independence.
Cash value	The <b>cash value</b> corresponds with the current worth of a future payment flow.
Compliance directives	<b>Compliance directives</b> are rules of conduct laid down for the prevention of insider trading, market manipulation, money laundering and corruption.
Contingent liabilities	<b>Contingent liabilities</b> are liabilities that may or may not be incurred.
Cost-to-cost method	The <b>cost-to-cost method</b> defines the ratio between the costs emanating from pro- duct manufacture and the anticipated total costs.
EBIT	<b>EBIT</b> (Earnings Before Interest and Taxes) is the end sum derived from the financial result, taxes and minority interests.
EBT	<b>EBT</b> (Earnings Before Taxes) is the result before taxes and minority interest.
Equity ratio	The <b>equity ratio</b> is an indicator of the relative proportion of equity used to finance a company's total assets.
Factoring	<b>Factoring</b> is the sale of accounts receivable in order to benefit directly from inco- ming payments even when they are due at a later date and to offload default risk, including the necessity to monitor for this.
Fair Value	<b>Fair Value</b> is the amount calculated in accordance with standard market methodology, at which an asset can be bought or sold between willing parties. In the case of listed stocks, fair value represents the current stock exchange price of the market value.
Goodwill	<b>Goodwill</b> is the difference between the purchase price and the sum of the fair value of the net assets of a company.
Held to Maturity	The term <b>held to maturity</b> documents the intention of a company to retain a long- term security until its date of maturity.

Impairment Test	Impairment tests serve the assessment of the value of asset items. Periodic evaluations of possible indications of a lasting reduction in value are stipulated by the International Financial Reporting Standards (IFRS).
International Accounting Standards Board (IASB)	The International Accounting Standards Board (IASB) is an independent body of international accountancy experts, which is responsible for the creation and amendment of the International Financial Reporting Standards (IFRS).
International Financial Reporting Standards (IFRS)	The <b>International Financial Reporting Standards (IFRS)</b> are auditing regulations, which ensure internationally comparable annual and consolidated annual reports and financial statements.
Kontrollbank refinancing facility (KRR)	The <b>Kontrollbank refinancing facility (KRR)</b> gives companies access to low-interest overdraft facilities to finance the working capital required for their export business. The Republic of Austria underwrites 80% of the credit risk to the company's principal bank by offering a bill of guarantee.
mid market	The <b>mid market</b> is a sub-segment of the equity market segment market.at of the Vienna Stock Exchange. The <b>mid market</b> comprises shares of companies which have been admitted to official trading or regulated free trading or are included in the Third Market, and which contractually undertake to maintain increased transparency, quality and publicity criteria.
Moving average price method	Using the <b>moving average price method</b> , following each addition to inventory, the average price is newly calculated and then applied to the next article sold.
Organic growth	<b>Organic growth</b> is designated as being the expansion achieved by a company using its own resources.
Percentage of completion method	The <b>percentage of completion method (PoC)</b> is a method of reporting income from long-term contracts based on the percentage of the contract completed during the financial year.
Projected unit credit method	Using the <b>projected unit credit method</b> , the cash value of future payments is established in an actuarial procedure via the estimated employee working time.
Return on equity (ROE)	<b>Return on equity</b> or <b>ROE</b> shows the interest earned on reinvested equity within a financial year.
Sale and lease back	<b>Sale and lease back</b> is a special form of leasing in which real estate or movable assets, but also intangible assets, are sold to a leasing company and are simultaneously leased back for further use.
UGB	<b>UGB</b> is the abbreviation used for the Austrian Commercial Code. With effect from 1 January 2007, the Austrian Commercial Code (HGB) was extensively revised through the Commercial Law Amendment Act (HaRÄG), Federal Law Gazette no. 2005/120 and renamed as the <b>Austrian Commercial Code (UGB)</b> .
Working capital	<b>Working capital</b> results from the difference between current assets and current liabilities. This ratio measures both a company's efficiency and its short-term financial health.
